Schram,Stephen G. Tibbetts,2017-02-13 Introduction to Criminology Why Do They Do It Second Edition by Pamela J Schram Stephen G Tibbetts offers a contemporary and integrated discussion of the key theories that help us understand crime in the 21st century With a focus on why offenders commit crimes this bestseller skillfully engages students with real world cases and examples to help students explore the fundamentals of criminology To better align with how instructors actually teach this course coverage of violent and property crimes has been integrated into the theory chapters so students can clearly understand the application of theory to criminal behavior Unlike other introductory criminology textbooks the Second Edition discusses issues of diversity in each chapter and covers many contemporary topics that are not well represented in other texts such as feminist criminology cybercrime hate crimes white collar crime homeland security and identity theft Transnational comparisons regarding crime rates and the methods other countries use to deal with crime make this edition the most universal to date and a perfect companion for those wanting to learn about criminology in context *Firearms Legislation* United States. Congress. House. Committee on the Judiciary. Subcommittee on Crime,1975 **Goal-based Decision Making** Stephen Slade,2013-06-17 This work presents a goal based model of decision making in which the relative priorities of goals drive the decision process a psychological alternative to traditional decision analysis Building on the work of Schank and Abelson the author uses goals as the basis for a model of

interpersonal relations which permits decisions to incorporate personal and adopted goals in a uniform manner The theory is modelled on the VOTE computer program which simulates Congressional roll call voting decisions The VOTE program expands traditional decision making and simulation models by providing not only a choice but also a natural language explanation in either English or French It simulates real members of Congress voting on real bills and producing reasonable explanations The program is consistent with much of the descriptive political science literature on Congressional decision making and provides an explicit model of political issues relationships and strategies that converge in voting behavior In developing the VOTE program the author draws on his own practical experience in politics from four presidential campaigns and the White House Given the underlying psychological basis of the program VOTE can be extended to other decision making domains different from politics Another use for the program is to simulate business decisions such as securities analysis as well as mundane decision making such as choosing a college or deciding whether to get a Mohawk haircut **An**
