Disillusioned Benjamin Herold, 2024-01-23 Astonishingly important Alex Kotlowitz The Atlantic Through the stories of five American families a masterful and timely exploration of how hope history and racial denial collide in the suburbs and their schools Outside Atlanta a middle class Black family faces off with a school system seemingly bent on punishing their teenage son North of Dallas a conservative white family relocates to an affluent suburban enclave but can t escape the changes sweeping the country On Chicago s North Shore a multiracial mom joins an

ultraprogressive challenge to the town's liberal status quo. In Compton, California, whose suburban roots are now barely recognizable, undocumented Hispanic parents place their gifted son's future in the hands of educators at a remarkable elementary school. And outside Pittsburgh, a Black mother moves to the same street where author Benjamin Herold grew up, then confronts the destructive legacy left behind by white families like his. Disillusioned, he braids these human stories together with penetrating local and national history to reveal a vicious cycle undermining the dreams upon which American suburbia was built. For generations, upwardly mobile white families have extracted opportunity from the nation's heavily subsidized suburbs, then moved on before the bills for maintenance and repair came due, leaving the mostly Black and Brown families who followed to clean up the ensuing mess. But now, sweeping demographic shifts and the dawning realization that endless expansion is no longer feasible are disrupting this pattern, forcing everyday families to confront a truth: their communities were designed to avoid it. The suburban lifestyle dream is a Ponzi scheme whose unraveling threatens us all. How do we come to terms with this troubled history? How do we build a future in which all children can thrive? Drawing upon his decorated career as an education journalist, Herold explores these pressing debates with expertise and perspective. Then, alongside Bethany Smith, the mother from his old neighborhood who contributes a powerful epilogue to the book, he offers a hopeful path toward renewal. The result is nothing short of a journalistic masterpiece.

Teaching First-Year College Students Maggie Murphy, 2019-05-15

The first year experience is an emerging hot topic in academic libraries, and many librarians who work with first year students are interested in best practices for engaging and retaining them. Professional discussion and interest groups, conferences, and vendor-sponsored awards for librarians working with first year students are popping up left and right. A critical aspect of libraries in the first year experience is effective information literacy instruction for first year students. Research shows that despite growing up in a world rife with technology and information, students entering college rarely bring with them the conceptual understandings and critical habits of thinking needed for finding, evaluating, and ethically using information in both academic and real world contexts. Faculty in upper level courses expect students to learn about the research process in their first year of college, and instructors in the first year curriculum expect librarians to teach this to their students. Despite all this, designing teaching and evaluating effective information literacy instruction specifically for first year students is not necessarily intuitive for instruction librarians. That is why *Teaching First Year College Students: A Practical Guide for Librarians* is a comprehensive how-to guide for both new and experienced librarians interested in planning teaching and assessing library instruction for first year students. The book examines the related histories of library instruction and first year experience initiatives, summarizes and synthesizes empirical research and educational theory about first year students as learners and novice researchers, establishes best practices for engaging first year students through active learning and inclusive teaching, and features excerpts from interviews with a number of instruction librarians who work

with first year students in a range of positions and instructional contexts Includes examples of activities lesson plans and assessment ideas for first year library instruction for common first year course scenarios Includes a template to use for library instruction lesson planning Written by a library instruction coordinator with a graduate degree in First Year Studies and a first year instruction librarian Teaching First Year College Students A Practical Guide for Librarians is the first comprehensive how to guide for both new and experienced librarians interested in planning coordinating teaching and assessing library instruction for first year students
