The Emotional Dynamics of Law and Legal Discourse Heather Conway, John Stannard, 2016-12-15 In his seminal work *Emotional Intelligence* Daniel Goleman suggests that the common view of human intelligence is far too narrow and that emotions play a much greater role in thought decision making and individual success than is commonly acknowledged The importance of emotion to human experience cannot be denied yet the relationship between law and emotion is one that has largely been ignored until recent years However the last two decades have seen a rapidly expanding interest among scholars of all disciplines into the way in which law and the emotions interact including the law's response to emotion and the extent to which emotions pervade the practice of the law In *The Emotional Dynamics of Law and Legal Discourse* a group of leading scholars from both sides of the Atlantic explore these issues across key areas of private law public law criminal justice and dispute resolution illustrating how emotion infuses all areas of legal thought The collection argues for a more positive view of the role of emotion in the context of legal discourse and demonstrates ways in which the law could in the words of Goleman become more emotionally intelligent **Theories of Emotion** Pia Campeggiani, 2022-12-15 *Theories of Emotion* is a philosophical introduction to the most influential theories of emotion of the past 60 years in philosophy psychology and biology This multi disciplinary approach provides the reader with a one stop shop for encountering the key debates and cutting edge ideas in what is becoming a central focus of contemporary thought An introductory chapter on definitions of emotion is followed by three main sections on the way emotions are expressed subjectively experienced and related to action and motivation This accessible but probing approach integrates philosophical analysis with innovative research in psychology and cognitive science contextualizing current debates in the history of ideas from Darwin to pragmatism Each section is introduced by a detailed illustration of a foundational thinker's work on emotion Charles Darwin William James and John Dewey respectively showing how their insights and discoveries have shaped current views and suggesting ways in which they

might still enrich contemporary approaches **Emotions, Community, and Citizenship** Rebecca Kingston, Kiran Banerjee, James McKee, Yi-Chun Chien, Constantine C. Vassiliou, 2017-03-17 Emotions are at the very heart of individual and communal actions They influence our social and interpersonal behaviour and affect our perspectives on culture history politics and morality Emotions Community and Citizenship is a pioneering work that brings together scholars from an array of disciplines in order to challenge and unite the disciplinary divides in the study of emotions These carefully selected studies highlight how emotions are studied within various disciplines with particular attention to the divide between naturalistic and interpretive approaches The editors of this volume have provided a nuanced and insightful introduction and conclusion which provide not only an overarching commentary but a framework for the interdisciplinary approach to emotion studies **Fifty Years of the Research and theory of R.s. Lazarus** Richard S. Levine, 2020-12-29 Healing the Reason Emotion Split draws on research from experimental psychology and neuroscience to dispel the myth that reason should be heralded above emotion Arguing that reason and emotion mutually benefit our decision making abilities the book explores the idea that understanding this relationship could have long term advantages for our management of society s biggest problems Levine reviews how reason and emotion operated in historical movements such as the Enlightenment Romanticism and 1960s counterculture to conclude that a successful society would restore human connection and foster compassion in economics and politics by equally utilizing reason and emotion Integrating discussion on classic and contemporary neurological studies and using allegory the book lays out the potential for societal change through compassion and would be of interest to psychologists concerned with social implications of their fields philosophy students social activists and religious leaders The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial CC BY NC 4 0 license Intelligent Tutoring Systems Vincent Aleven, Judy Kay, Jack Mostow, 2010-06-04 The 10th International Conference on Intelligent Tutoring Systems ITS 2010 continued the bi annual series of top flight international conferences on the use of advanced educational technologies that are adaptive to users or groups of users These highly interdisciplinary conferences bring together researchers in the learning sciences computer science cognitive or educational psychology cognitive science artificial intelligence machine learning and
