*The International Handbook on Psychopathic Disorders and the Law* Alan Felthous, Henning Saß, 2008-03-10 The economic impact of society's efforts to rehabilitate and contain psychopathically disordered individuals can be enormous. Understanding these disorders developing valid assessment methods and providing safe effective treatments is therefore of paramount importance. Reflecting the work of a truly international panel of experts from Europe North America and Asia the International Handbook on Psychopathic Disorders and the Law offers an in depth multidisciplinary look at key aspects of the development and etiology of psychopathic disorders current methods of intervention treatment and management and how these disorders impact decision making in civil and criminal law Psychopathy Unmasked Rasmus Rosenberg

Larsen, 2025-06-17 Why our fascination with psychopaths is scientifically wrongheaded and how the criminal justice system has misused the controversial science of psychopathy. Psychopathy is a widely acknowledged personality disorder associated with callous unemotional traits and antisocial behaviors. Psychopathic persons are described as dangerous predators incapable of empathy and moral intuition and while they are believed to make up only around 1 percent of the general population forensic experts claim they are disproportionately responsible for the majority of violent crimes. Today psychopathy assessments are being widely used in the legal system to inform a variety of judicial decisions. In Psychopathy Unmasked Rasmus Rosenberg Larsen provides a critical rebuttal of psychopathy and its legal use scrutinizing central claims about the diagnosis that have traditionally served to justify its role in the criminal justice system. It is estimated that hundreds of thousands of offenders undergo a psychopathy assessment each year in North America. This book surveys and discusses contemporary developments in psychopathy research where studies have consistently shown that psychopathic persons contrary to mainstream beliefs are not meaningfully more dangerous than or psychologically different from ordinary non psychopathic criminals. Based on these disqualifying findings Larsen argues that we should end the use of psychopathy assessments in the legal system.
