Usage-Based Studies in Modern Hebrew Ruth A. Berman, 2020-03-18 The goal of the volume is to shed fresh light on Modern Hebrew from perspectives aimed at readers interested in the domains of general linguistics typology and Semitic studies Starting with chapters that provide background information on the evolution and sociolinguistic setting of the language the bulk of the book is devoted to usage based studies of the morphology lexicon and syntax of current Hebrew Based primarily on original analyses of authentic spoken and online materials these studies reflect varied theoretical frames of reference that are largely model neutral in approach To this end the book presents a functionally motivated dynamic approach to actual usage rather than providing strictly structuralist or formal characterizations of particular linguistic systems Such a perspective is particularly important in the case of a language undergoing accelerated processes of change in which the gap between prescriptive dictates of the Hebrew Language Establishment and the actual usage of educated literate but non expert speaker writers of current Hebrew is constantly on the rise

Individual and Contextual Factors in the English Language Classroom Rahma Al-Mahrooqi, Christopher J. Denman, 2022-03-22 This edited volume examines a number of topics related to the roles of individual and contextual factors in English as second or foreign language ESL EFL settings by presenting chapters across the three sections of theoretical and pedagogical approaches teacher and learner research and research into the roles of technology The book has a focus on practical actions and recommendations related to individual and contextual factors in ESL EFL with a specific concern with issues of cognition metacognition emotion and identity and offers perspectives from a diverse range of international education settings For teachers of ESL EFL the effective recognition and integration of individual and contextual factors into the classroom may represent a significant challenge This is often the case in those

settings where native English speaking teachers work in foreign language contexts where they may have limited understanding of local cultures and languages or where language instructors have class groups that are culturally and linguistically diverse In these and similar contexts the types and extent of individual and contextual factors impacting on language learning may challenge both learner and instructor expectations of what an effective and supportive classroom is While such a situation offers numerous opportunities for learners and teachers to expand their knowledge of themselves and each other it also presents the possibility for ineffective teaching and learning to occur It is within this framework that the book presents the latest theoretical pedagogical and research perspectives from around the world thereby providing a resource for all stakeholders with an interest in the roles individual and contextual factors play in the English learning process

The Routledge Handbook of Endangered and Minority Languages Weixiao Wei, James Schnell, 2025-02-20 The Routledge Handbook of Endangered and Minority Languages addresses the urgent need for comprehensive language documentation and a deeper understanding of language identity emphasizing the preservation of endangered languages This book argues that safeguarding linguistic diversity enriches global cultural heritage and knowledge By meticulously documenting minority languages we not only preserve words and grammar but also the unique cultural narratives they carry The book also introduces new language learning paradigms that recognize the complexities of multilingual societies advocating for educational systems that embrace the diverse linguistic backgrounds of students These approaches aim to create more inclusive and effective learning environments by valuing multilingualism Exploring the fluid nature of language identity the book examines how sociopolitical contexts and technology influence it calling for policies that respect linguistic rights and promote social cohesion It presents case studies from diverse regions including the Pacific Nordic countries Cornwall Pakistan the UAE and more offering practical strategies for language preservation and revitalization Groundbreaking insights into the use of digital tools social media and AI in language preservation along with the challenges and successes of various revitalization efforts make this book a valuable resource for researchers educators and policymakers committed to fostering linguistic diversity and equity worldwide

Understanding Developmental Dyslexia: Linking Perceptual and Cognitive Deficits to Reading Processes Pierluigi Zoccolotti, Peter F. de Jong, Donatella Spinelli, 2016-06-24 Understanding the mechanisms responsible for developmental dyslexia DD is a key challenge for researchers A large literature mostly concerned with learning to read in opaque orthographies emphasizes phonological interpretations of the disturbance Other approaches focused on the visual perceptual aspects of orthographic coding Recently this perspective was supported by imaging data showing that individuals with DD have hypo activation in occipito temporal areas a finding common to both transparent and opaque orthographies Nevertheless it is difficult to infer causal relationships from activation data Accommodating these findings within the cognitive architecture of reading processes is still an open issue This is a general problem which is present in much of the literature For example several

studies investigating the perceptual and cognitive abilities that distinguish groups of children with and without DD failed to provide explicit links with the reading process. Thus several areas of investigation e.g. acoustic deficits or magnocellular deficiencies have been plagued by replication failures. Furthermore much research has neglected the possible contribution of comorbid symptoms. By contrast it is now well established that developmental disorders present a large spectrum of homotopic and heterotopic co-morbidities that make causal interpretations problematic. This has led to the idea that the etiology of learning difficulties is multifactorial thus challenging the traditional models of DD. Recent genetic studies provide information on the multiple risk factors that contribute to the genesis of the disturbance. Another critical issue in DD is that much of the research has been conducted in English speaking individuals. However English is a highly irregular orthography and doubts have been raised on the appropriateness of automatically extending interpretations based on English to other more regular orthographies. By contrast important information can be gotten from systematic comparisons across languages. Thus the distinction between regular and irregular orthographies is another potentially fruitful area of investigation. Overall in spite of much research current interpretations seem unable to integrate all available findings. Some proposals focus on the cognitive description of the reading profile and explicitly ignore the distal causes of the disturbance. Others propose visual acoustic or phonological mechanisms but fail to link them to the pattern of reading impairment present in different children. The present Research Topic brings together studies based on different methodological approaches i.e. behavioural studies examining cognitive and psycholinguistic factors eye movement investigations biological markers neuroimaging and genetic studies involving dyslexic groups with and without comorbid symptoms and in different orthographies transparent and opaque to identify the mechanisms underlying DD. The RT does not focus on a single model or theory of dyslexia but rather brings together different approaches and ideas which we feel are fruitful for a deeper understanding developmental dyslexia.
