Wave Propagation for Train-induced Vibrations Yeong-Bin Yang, 2009 For buildings and factories located near railway or subway lines the vibrations caused by the moving trains especially at high speeds may be annoying to the residents or detrimental to the high precision production lines However there is a lack of simple and efficient tools for dealing with the kind of environmental vibrations concerning simulation of the radiation of infinite boundaries irregularities in soils buildings and wave barriers and dynamic properties of the moving vehicles This book is intended to fill such a gap

Handbook of Human Factors in Medical Device Design Matthew Bret Weinger, Michael E. Wiklund, Daryle Jean Gardner-Bonneau, 2010-12-13 Developed to promote the design of safe effective and usable medical devices Handbook of Human Factors in Medical Device Design provides a single convenient source of authoritative information to support evidence based design and evaluation of medical device user interfaces using rigorous human factors engineering principles It offers guidance

Fundamentals of Noise and Vibration Frank Fahy, John Walker, 1998-10-01 Fundamentals of Noise and Vibration is based on the first semester of the postgraduate Masters course in Sound and Vibration Studies at the Institute of Sound and Vibration Research at the University of Southampton The main objective of the course is to provide students with the skills and knowledge required to practise in the field of noise and

vibration control technology Readers do not need prior formal training in acoustics although a basic understanding of mechanics fluid dynamics and applied mathematics is required Many of the chapters use examples of models and forms of analysis to illustrate the principles that they introduce By pointing toward the practical application of these fundamental principles and methods the book will benefit those wishing to extend their knowledge and understanding of acoustic and vibration technology for professional purposes Advanced Applications in Acoustics Noise and Vibration serves as a companion volume

Human Factors Issues in Handgun Safety and Forensics Hal W. Hendrick, Paul Paradis, Richard J.
