Indigenous Peoples, Natural Resources and Permanent Sovereignty explores the possibility to conceive a permanent sovereignty over natural resources vested in indigenous peoples rather than in States. The author examines the conceptualisation and content under customary international law of indigenous rights with respect to natural resources, including the impact of the adoption of the United Nations Declaration on the Rights of Indigenous Peoples in 2007. The book provides a deep and updated analysis on international customs, international and regional conventions, and the jurisprudence of regional courts concerning indigenous rights to natural resources, including the most recent developments in domestic jurisprudence and legislation. *Small Island States & International Law* Carolin König, 2022-12-30

What happens under international law if a state perishes due to rising sea levels without a successor state being created? Will the state cease to exist? What would this mean for its population? Have international law and globalization progressed enough to protect the people thus affected, or does international law still depend on the territorial state when it comes to protecting entire populations? Exploring these issues, this book provides answers to these pressing questions. Focusing on small island states as actors in the international community, it evaluates the challenges that the state as a subject of international law faces in general from globalization and humanization and what this means for small island states threatened by rising seas. Highlighting the experience of the indigenous peoples of small island states as collectives and to the individuals living in these states, the book addresses fundamental questions of general state theory and international law, drawing on an extensive body of source material. As rising sea levels present an increasingly pressing threat to small island states, this book highlights the importance of international protection of the individual and the capacity of international organizations to act within existing international law. It identifies pressing problems where immediate action is required and argues that in future the responsibility for protecting individuals could shift to the international community if a sinking island state can no longer protect its population on its own. **A New Testament** Tone Bleie, 2023-12-19

Lawful Conquest? Constanze Weiske, 2021-10-04 The global expansion of European colonization is commonly perceived as lawful according to the valid European colonial law of the time This book is substantially challenging this belief by uncovering its legal justifications based on discovery and terra nullius as retrospectively created legal fictions and demonstrating its untenability in practice Focused on the critical reconstruction of Spanish and Dutch colonization practices in northeastern South America Trinidad and Tobago between 1498 and 1817 the book offers an illuminating view on the European shadow of the colonial past in the Americas Based on the application of an innovative comparative spatio legal Global History approach to 1 770 excavated European colonial written sources from archives of both sides of the Atlantic in comparison to the colonial legal provisions of Europe s most influential legal writers the book moreover provides a substantial argument to the contemporary Caribbean European reparation debate in favor of the return of Indigenous Peoples historical territories Therefore the book calls for the extension of the traditional territory approach to reparations of the United Nations Declaration of the Rights of Indigenous Peoples UNDRIPs and the Inter American Court of Human Rights IACHR

Narratives of Mass Atrocity Sarah Federman, Ronald Niezen, 2022-09-08 Individuals can assume and be assigned multiple roles throughout a conflict perpetrators can be victims and vice versa heroes can be reassessed as complicit and compromised However

accepting this more accurate representation of the narrativized identities of violence presents a conundrum for accountability and justice mechanisms premised on clear roles. This book considers these complex, sometimes overlapping roles as people respond to mass violence in various contexts, from international tribunals to NGO-based social movements. Bringing the literature on perpetration in conversation with the more recent field of victim studies, it suggests a new, more effective and reflexive approach to engagement in post-conflict contexts. Long-term positive peace requires understanding the narrative dynamics within and between groups, demonstrating that the blurring of victim-perpetrator boundaries and acknowledging their overlapping roles is a crucial part of peacebuilding processes. This title is also available as Open Access on Cambridge Core.

An Interdisciplinary Journey from Non-Discrimination to Collective Rights Jessika Eichler, 2024-04-22. This book develops a critique of the equality paradigms and principles to be found in the majority of today's legal orders. It accompanies the reader, taking her/him from a critique of non-discrimination and equality to the opposite end of the spectrum, that is, to collective rights, collectivization processes, and a manifestation of recognition that is based on difference. This interdisciplinary theoretical journey explores a multiplicity of legal orders in terms of how they provide spaces of articulation for difference. The book draws emblematically on the rights of indigenous peoples as well as recognized and unrecognized cultural, ethnic, linguistic, and religious minorities. The book thereby builds on legal and political theory, which ultimately proves essential given the dedicated objective of the book, that is, to introduce a variety of recognition principles and what the author terms scales of collectivization, which facilitate a better understanding of collective rights and further ways to capture, define, and ultimately measure these rights.

Decolonizing the Criminal Question Ana J. Aliverti, Ana Aliverti, Henrique Carvalho, Anastasia Chamberlen, Máximo Sozzo, 2023. This volume explores the uneasy relationship between crime, crime control, and colonialism, foregrounding the relevance of the legacies of this relationship to criminological enquiries. The first to apply abolitionist theory from international perspectives to social work, this book explores whether social work has a future as a profession that challenges the perpetuation of unjust social structures. It questions whether it is possible for social work to become radical while it is located within the state.

Human Rights and Subjectivity Elisabeth Roy-Trudel, 2024-11-14. This book draws on a range of theoretical frameworks to challenge the limited conception of subjectivity upon which human rights are based. The book focuses on some of the ways in which dominant discourses are in tension with human rights' fundamental claim to universality by ignoring multiple ways of being. Different theoretical and methodological approaches are used to analyse this creation of exclusions. These include Hannah Arendt's figure of the refugee, posthumanist critiques, and non-Western critical theories such as Black Indigenous and decolonial approaches. Often, these approaches are used in isolation, but together they reveal how the dominant concept of subjectivity

has always needed an Other and that the human at the heart of human rights is not a universal concept The book also pursues an analysis of visual discourses in the field of international human rights with a focus on the ways in which exclusions are represented and entrenched through the visual It argues that international human rights are based on a vision centred sensorium and certain processes of reasoning that exclude emotions Finally the book considers how international human rights could embrace other forms of thinking and being in the world and recognize different sensory experiences This original perspective on the limits of human rights will appeal to legal theorists socio legal scholars and others working in politics sociology anthropology and cultural studies with an interest in contemporary approaches to social justice and critical approaches Foreign Investment, Human Rights and Environmental Protection Shawkat Alam, Abdullah Al

Faruque, 2024-11-22 This book examines the integration of human rights and environmental standards within international investment agreements IIAs It explores the intricate relationship between foreign direct investment and sustainable development emphasizing the necessity for reform in investment treaties to ensure they support rather than hinder human rights and environmental protection The book begins with an overview of the current international investment law landscape focusing on its primary goal of investment protection It then delves into how human rights and environmental standards can shape IIAs suggesting a new approach to these treaties The authors explore the incorporation of sustainable development principles into IIAs the difficulty of balancing investor protection with state regulatory autonomy and the evolving norms and standards in this area The book includes detailed case studies on topics such as the interplay between labour standards investment and human rights bilateral investment agreements sustainable forest management and the liberalization of water services Aimed at policymakers legal scholars and international law practitioners this book provides a thorough framework for understanding and reforming IIAs It offers groundbreaking insights into aligning investment treaties with global sustainable development goals making it a vital resource for anyone interested in the intersection of investment human rights and environmental sustainability **The Human Rights Imperative in Teacher Education** Gloria T.
