Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s D B Weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease **Health Psychology, 2nd Edition** Deborah Fish Ragin, 2015-07-22 A truly interdisciplinary approach to the study of health Health Psychology An Interdisciplinary Approach uses the social ecological perspective to explore the impact of five systems on individual health outcomes individual culture family social physical environment health systems and health policy In order to provide readers with an understanding of how health affects the individual on a mental and emotional level the author has taken an interdisciplinary approach considering the roles of anthropology biology economics environmental studies medicine public health and sociology *Clinical skills ;Investigations and their interpretation ;Ocular trauma ;Lids ;Lacrima ;Conjunctiva ;Cornea ;Sclera ;Lens ;Glaucoma ;Uveitis ;Vitreoretinal ;Medical retina ;Orbit ;Intraocular tumours ;Neuro-ophthalmology ;Strabismus ;Paediatric ophthalmology ;Refractive ophthalmology ;Aids to diagnosis ;Vision in context ;Ophthalmic surgery: anaesthetics and perioperative care ;Ophthalmic surgery - theatre notes ;Laser ;Therapeutics ;Evidence-based ophthalmology ;Resources* Alastair K.
