Assessment of Approaches for Using Process Safety Metrics at the Blue Grass and Pueblo Chemical Agent Destruction Pilot Plants National Research Council,Division on Engineering and Physical Sciences,Board on Army Science and Technology,Committee to Assess Process Safety Metrics for the Blue Grass and Pueblo Chemical Agent Destruction Pilot Plants,2011-05-19 The Department of Defense through the Assembled Chemical Weapons Alternatives program is currently in the process of constructing two full scale pilot plants at the Pueblo Chemical Depot in

Colorado and the Blue Grass Army Depot in Kentucky to destroy the last two remaining inventories of chemical weapons in the U S stockpile These two storage sites together account for about 10 percent of the original U S chemical agent stockpile that is in the process of being destroyed in accordance with the international Chemical Weapons Convention treaty Unlike their predecessors these facilities will use neutralization technologies to destroy agents contained within rockets projectiles and mortar rounds requiring the use of specially designed equipment As part of its focus on safe operation of the planned facilities the Program Manager for Assembled Chemical Weapons Alternatives asked the National Research Council NRC to conduct a study to offer guidance on the application of process safety metrics at the Pueblo Chemical Depot and Blue Grass Army Depot Process safety is a disciplined framework for managing the integrity of operating systems processes and personnel handling hazardous substances and operations by applying good design principles engineering and operating practices Process Safety Metrics at the Blue Grass and Pueblo Chemical Agent Destruction Pilot Plants discusses the use of leading and lagging process safety metrics that could provide feedback on the effectiveness of controls to mitigate risks and minimize consequences of potential incidents The book makes several recommendations that will facilitate the development and application of process safety metrics at both sites

Guidelines for Integrating Process Safety into Engineering Projects CCPS (Center for Chemical Process Safety),2018-12-11 There is much industry guidance on implementing engineering projects and a similar amount of guidance on Process Safety Management PSM However there is a gap in transferring the key deliverables from the engineering group to the operations group where PSM is implemented This book provides the engineering and process safety deliverables for each project phase along with the impacts to the project budget timeline and the safety and operability of the delivered equipment *Guidelines for Implementing Process Safety Management* CCPS (Center for Chemical Process Safety),2016-06-30 The 2nd edition provides an update of information since the publication of the first edition including best practices for managing process safety developed by industry as well as incorporate the additional process safety elements In addition the book includes a focus on maintaining and improving a Process Safety Management PSM System This 2nd edition also provides how to information to determine process safety performance status implement one or more new elements into an existing PSM system maintain or improve an existing PSM system and manage future process safety performance
