## **Halfway To Anywhere Achieving Americas Destiny In Space:**

**Halfway to Anywhere** G. Harry Stine, 1998 Halfway to Anywhere tells the story of the development and future potential of the reusable Single Stage To Orbit SSTO spaceship a spaceship NASA bureaucrats once said was impossible But an experimental rocket the DC X was built in twenty two months with a tiny government contract and parts scrounged from space junk yards and Wal mart The DC X first flew in 1993 and was repeatedly flown and tested until 1995 it proved the concepts of reusability and quick turnaround like an airliner SSTO means economical reliable on demand space transportation of people and cargos to and from low Earth orbit within a decade Commercial spaceships that operate like airliners are possible and profitable and Halfway to Anywhere tells how and why *Single Stage to Orbit* Andrew J. Butrica, 2004-12-01 Winner of the Michael C Robinson Prize for Historical Analysis given by the National Council on Public History While the glories and tragedies of the space shuttle make headlines and move the nation the story of the shuttle forms an inseparable part of a lesser known but no less important drama the search for a reusable single stage to orbit rocket Here an award winning student of space science Andrew J Butrica examines the long and tangled history of this ambitious concept from its first glimmerings in the 1920s when technicians dismissed it as unfeasible to its highly expensive heyday in the midst of the Cold War when conservative backed government programs struggled to produce an operational flight vehicle Butrica finds a blending of far sighted engineering and heavy handed politics To the first and oldest idea that of the reusable rocket powered single stage to orbit vehicle planners who belonged to what President Eisenhower referred to as the military industrial complex added experimental X aircraft like capabilities and eventually a faster cheaper smaller managerial approach Single Stage to Orbit traces the interplay of technology corporate interest and politics a combination that well served the conservative space agenda and ultimately triumphed not in the realization of inexpensive reliable space transport but in a vision of space militarization and commercialization that would appear settled United States policy in the early twenty first century *A City on Mars* Kelly Weinersmith, Zach Weinersmith, 2025-07-29 THE INSTANT NEW YORK TIMES BESTSELLER Winner of the Hugo Award Scientific American's 1 Book for 2023 Winner of Royal Society's Trivedi Prize A Guardian Best Book of 2024 A New York Times Book Review Editors Choice A Times Best Science and Environment Book of 2023 A Tor.com Best Book of 2023 Exceptional Forceful engaging and funny This book will make you happy to live on this planet a good thing because you're not leaving anytime soon New York Times Book Review From the bestselling authors of *Soonish* a brilliant and hilarious off world investigation into space settlement EARTH IS NOT WELL The promise of starting life anew somewhere far far away no climate change no war no doomscrolling beckons and settling the stars nally seems within our grasp Or is it Critically acclaimed bestselling authors Kelly and Zach Weinersmith set out to write the essential guide to a glorious future of space settlements but after years of research they aren't so sure it's a good idea Space technologies and space businesses are progressing fast but we lack the knowledge needed to have space kids build space

farms and create space nations in a way that doesn't spark conflict back home In a world hurtling toward human expansion into space A City on Mars investigates whether the dream of new worlds won't create nightmares both for settlers and the people they leave behind In the process the Weinersmiths answer every question about space you've ever wondered about and many you've never considered Can you make babies in space Should corporations govern space settlements What about space war Are we headed for a housing crisis on the Moon's Peaks of Eternal Light and what happens if you're left in the Craters of Eternal Darkness Why do astronauts love taco sauce Speaking of meals what's the legal status of space cannibalism With deep expertise a winning sense of humor and art from the beloved creator of Saturday Morning Breakfast Cereal the Weinersmiths investigate perhaps the biggest questions humanity will ever ask itself whether and how to become multiplanetary Get in we're going to Mars

Space Enterprise Phillip Harris, 2009-12-29 In Space Enterprise Living and Working Offworld Dr Philip Harris provides the vision and rationale as to why humanity is leaving its cradle Earth to use space resources as well as pursuing lunar industrialization and establishing offworld settlements As a management space psychologist Dr Harris presents a behavioral science perspective on space exploration and enterprise In this his 45th book Phil has completely revised and updated the two previous editions of this classic placing new emphasis on the need for more synergy and participation by the private sector He not only provides a critical review of what is happening in the global space community but offers specific strategies for lunar economic development The author analyzes the human factors in contemporary and future space developments especially relative to the deployment of people aloft This user friendly volume offers numerous photographs diagrams exhibits and case studies

**To Reach the High Frontier** Roger D. Launius, Dennis R. Jenkins, 2014-07-11 Access no single word better describes the primary concern of the exploration and development of space. Every participant in space activities civil military scientific or commercial needs affordable reliable frequent and flexible access to space. To Reach the High Frontier details the histories of the various space access vehicles developed in the United States since the birth of the space age in 1957. Each case study has been written by a specialist knowledgeable about the vehicle described and places each system in the larger context of the history of spaceflight. The technical challenge of reaching space with chemical rockets the high costs associated with space launch the long lead times necessary for scheduling flights and the poor reliability of the rockets themselves show launch vehicles to be the space program's most difficult challenge.

**Space Politics and Policy** E. Sadeh, 2006-04-11 Space Politics and Policy An Evolutionary Perspective provides a comprehensive survey of Space Policy. This book is organized around two themes. Space Policy is evolutionary in that it has responded to dramatic political events such as the launching of Sputnik and the Cold War and has undergone dynamic and evolutionary policy changes over the course of the space age. Space Policy is an integral part of and interacts with public policy processes in the United States and abroad. The book analyzes Space Policy at several levels including historical context political actors and institutions political processes and policy outcomes. It examines the symbiotic relationships between policy technology and science provides a review and synthesis of the existing body of knowledge in Space Policy and identifies Space Policy trends and developments from the beginnings of the space age through the current era of the twenty first century.

**Critical Issues in the History of Spaceflight** Stephen J. Dick, Steven J. Dick, Roger D. Launius, 2006. In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history. This volume is a collection of essays based on those deliberations. The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W. Bush in January 2004 to go to the Moon Mars and beyond. This Vision in turn stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board. The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experience.

**Reinventing NASA** Roger Handberg, 2003-12-30 From its beginnings NASA was convinced that its real mission was to create the opportunity for a much different and better society on Earth namely through human space flight. Pursuit of such a goal has led the agency to persist in certain activities even when they conflict with the wishes of Congress and the President. Recent changes in the international environment changes that

began well before September 11 2001 have brought the military back into the field of human space flight a situation that holds certain hazards for NASA since the military is more powerful politically Dramatic changes could be in store changes that could severely damage NASA's capacity for continuing what it sees as its primary objective While most analyses see the agency as riddled with incompetence Handberg argues that NASA's troubles are a product of its internal values He begins with an historical overview of the major themes in NASA's history followed by chapters on specific areas of concentration such as the space station space transportation space science and internal reforms He also discusses the long term future of the agency and human space flight in general both domestically and internationally *The Hypersonic Revolution* Larry Schweikart, 2003-03 By Larry Schweikart et al Edited by Richard P Hallion Consists of 3 volumes V 1 From Max Valier to Project PRIME 1924-1967 V 2 From Scramjet to the National Aero Space Plane 1964-1986 and V 3 The Quest for the Orbital Jet the National Aero Space Plane Program 1983-1995 Critical issues in the history of spaceflight Steven J. Dick, 2018

The Hypersonic Revolution: From Max Valier to Project PRIME, 1924-1967, 1998 **Exploring the Solar System** R. Launius, 2012-12-28 Beginning in the early days of the Space Age well before the advent of manned spaceflight the United States followed soon by other nations undertook an ambitious effort to study the planets of the solar system The remarkable fruits of this research revolutionized the public's view of their celestial neighbors capturing the imaginations of people from all backgrounds like nothing else save the Apollo lunar missions From the first space probes to the most recent planetary rovers they have continually delivered impressive discoveries and reshaped our understanding of the cosmos Offering fascinating investigations into this crucial chapter in space history this collection of specially commissioned essays from leading historians opens new vistas in our understanding of the development of planetary science Realizing Tomorrow Chris Dubbs, Emeline Paat-Dahlstrom, 2020-04-01 U S A F Chief of Staff 2013 Professional Reading List Selection Nearly forty years passed between the Apollo moon landings the grandest accomplishment of a government run space program and the Ansari X PRIZE winning flights of SpaceShipOne the greatest achievement of a private space program Now as we hover on the threshold of commercial spaceflight authors Chris Dubbs and Emeline Paat Dahlstrom look back at how we got to this point Their book traces the lives of the individuals who shared the dream that private individuals and private enterprise belong in space *Realizing Tomorrow* provides a behind the scenes look at the visionaries the crackpots the financial schemes the legal wrangling the turf battles and underpinning the entire drama the overwhelming desire of ordinary people to visit outer space A compelling story of the pioneers of commercial spaceflight and their efforts to open the final frontier to everyone this book traces the path to private spaceflight even as it offers an instructive entertaining and cautionary note about its future **Space Exploration and Humanity** American Astronautical Society, 2010-08-23 A complete history of human endeavors in space this book also moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications In

two expertly written volumes *Space Exploration and Humanity A Historical Encyclopedia* covers all aspects of space flight in all participating nations ranging from the Cold War era beginnings of the space race to the lunar landings and the Apollo Soyuz mission from the Shuttle disasters and the Hubble telescope to Galileo the Mars Rover and the International Space Station The book moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications Produced in conjunction with the History Committee of the American Astronautical Society this work divides its coverage into six sections each beginning with an overview essay followed by an alphabetically organized series of entries on topics such as astrophysics and planetary science civilian and commercial space applications human spaceflight and microgravity science space and society and space technology and engineering Whether investigating a specific issue or event or tracing an overarching historic trend students and general readers will find this an invaluable resource for launching their study of one of humanity's most extraordinary endeavors

**Space Force!** Taylor Dinerman, 2021-09-14 The desire to establish a US Space Force has been around for decades in both science fiction and in the minds of people who attempt to seriously consider what our nation needs in order to deter future wars and if necessary to fight and win them As an institution the US Space Force has gotten off to a shaky start however prolific space writer Taylor Dinerman has great confidence that someday soon it will find the right leadership and eventually be emancipated from the Department of the Air Force At that point the institution can begin to truly serve the great cause of creating a spacefaring civilization as it was always meant to

**Nanofuture** J. Storrs Hall, Ph.D, 2010-05 Will the new scientific revolution of nanotechnology be for better or worse Readers will find out the likely reality from an expert Dr J Storrs Hall in this absorbing insider's guide to the near future *Handbook of Space Engineering, Archaeology, and Heritage* Ann Darrin, Beth L. O'Leary, 2009-06-26 Some might think that the 27 thousand tons of material launched by earthlings into outer space is nothing more than floating piles of debris However when looking at these artifacts through the eyes of historians and anthropologists instead of celestial pollution they are seen as links to human history and heritage *Space The New Frontier for Art* *The Rise of the Commercial Space Industry* Brian C. Odom, 2024-09-13 This collection explores the evolution of the commercial space industry from the beginning of the space age through the early twenty first century Today the space industry is taking on an increased leadership and innovation role in both space access and exploration The growth of commercial space over the past decades offers a potential new paradigm for space exploration one in which industry transitions from supplier to partner However many questions remain This book seeks to bring to light these questions which span from the most seemingly consequential how will humanity explore the Moon and Mars to the most basic what is commercial space To further develop the historical context of commercial space and thereby better inform decision making at NASA in the future this volume examines a broad range of questions related to the history of commercial space operations including but not limited to how has the concept of commercial space evolved in

different fields and disciplines What have been the major events and milestones in the emergence and evolution of commercial space activities in the USA and internationally How has the US Government assisted or impeded the emergence and evolution of commercial space activities Providing contributions from a range of different disciplines and backgrounds the authors of this volume offer valuable insights for scholars researching the history of space and space policy as well as decision makers working at NASA or within the wider space industry
