comparable industry level data on outputs inputs and productivity By rethinking economic development beyond existing measurements the book s contributors align the measurement of growth and productivity to contemporary global challenges addressing the need for measurements as well as the Gross Domestic Product All contributors in this foundational volume are recognized experts in their fields all inspired by the path breaking research of Dale W Jorgenson Demonstrates how an approach based on sources of economic growth KLEMS capital labor energy materials and services can be used to analyze economic growth and productivity Includes examples covering the G7 E7 EU Latin America Norway China Taiwan Japan Korea India and other South Asian countries Examines the effects of digital information communication and integrated technologies on national and regional economies *Handbook of Choice Modelling* Stephane Hess,Andrew Daly,2024-06-05 This thoroughly revised second edition Handbook provides an authoritative and in depth overview of choice modelling covering essential topics range from data collection through model specification and estimation to analysis and use of results It aptly emphasises the broad relevance of choice modelling when applied to a multitude of fields including but not limited to transport marketing health and environmental economics **Climate and Energy** E. Calvin Beisner,2024-03-26 The attempted cures for climate change are generally worse than the disease especially for the poor In this groundbreaking volume experts in all the fields related to climate change explain for laymen what we know about climate change and evaluate from a Christian perspective the proposed responses Demands to transform the global energy infrastructure to depend heavily on wind solar and other renewables are harmful to people in America and the world especially to the poor Meanwhile continued large scale use of traditional energy sources like nuclear hydro and fossil fuels would reduce poverty while doing less harm to the environment **Climate and Energy The Case For Realism** combines outstanding climate science physics economics environmental science political science ethics and theology to present a well reasoned understanding of human induced climate change and how to respond to it **South Asia Economic Update October, 2020** World Bank,2020-10-08 The COVID 19 pandemic which is still impacting South Asia has temporarily brought the region to a near standstill Governments proactively stabilized activity through monetary easing fiscal stimulus and supportive financial regulation but the situation is fragile amid weak buffers and exhausted policy tools South Asia s GDP is expected to contract 7.7 percent this year by far the largest decline on record but uncertainty around the forecast is substantial The informal economy in South Asia has been hit hard Many unorganized workers self employed people and microenterprises have experienced a large drop in earnings as the service sectors that were affected most by the lockdowns are dominated by informality Informal workers and firms tend to have inadequate mechanisms for coping with short term demand and supply interruptions due to limited savings and constrained access to finance While the poor have suffered severely during the crisis many informal workers in the middle of the income distribution have experienced the greatest drop in earnings Most of them are not covered by social insurance The crisis lays bare complicated structural problems in the informal sector that need to

be addressed *Handbook of Research Methods and Applications in Economic Geography* Charlie Karlsson, Martin Andersson, Therese Norman, 2015-02-27 The main purpose of this Handbook is to provide overviews and assessments of the state of the art regarding research methods approaches and applications central to economic geography The chapters are written by distinguished researchers from a variety of countries *Climate Economics* Michael Roos, Franziska M. Hoffart, 2020-11-13 This book is a philosophical critique of the economics of climate change from both an ethical and philosophy of economics perspective Mitigating climate change is not so much a scientific problem but rather a political social and above all an economic problem A future without greenhouse gas emissions requires a radical transformation towards a sustainable low carbon economy and society How this transformation could be achieved raises numerous economic questions Many of these questions remain untouched although economists are equipped with a suitable toolkit and expertise This book argues that economists have a social responsibility to carry out more research on how global warming could be stopped and that ultimately economic analysis of climate change must be a political economic approach that treats the economy as part of a wider social system This approach will be of interest to policy makers educators students and researchers in support of more pluralism in economic research and teaching
