Handbook of Cane Sugar Engineering Emile Hugot, 1986 Hugot's Handbook of Cane Sugar Engineering needs little introduction it can be found in technical libraries in cane sugar producing countries all over the world Unique in the extent and thoroughness of its coverage the book has for many years provided the only complete description of cane sugar manufacture mills diffusers boilers and other factory machinery calculation methods of capacity for every piece of equipment and process and manufacturing techniques This new edition has been extensively revised Information that has become obsolete or of little interest has been deleted or severely shortened Detailed additions have been made to chapters dealing with recently developed equipment An entirely new chapter has been added on automation and data processing Numerous figures graphs drawings photographs tables and formulae are provided The metric system has been used throughout the book but because many factories still use the British units all measures formulae and tables and nearly all calculations have been given in both systems Handbook of Cane Sugar Engineering Emile Hugot, 1964 **Handbook of Cane Sugar**

Engineering Emile Hugot, 1964 **Handbook of Cane Sugar Engineering** Emile Hugot, 1972 Handbook of Cane Sugar Engineering Paul Zindel, 1972 Introduction to Cane Sugar Technology G. H. Jenkins, 2013-09-03 Introduction to Cane Sugar Technology provides a concise introduction to sugar technology more specifically cane sugar technology up to the production of raw sugar Being intended originally for use in a post graduate university course the book assumes a knowledge of elementary chemical engineering as well as adequate knowledge of chemistry In the field of sugar manufacture itself the object of the book is to place more emphasis on aspects which are not adequately covered elsewhere In accordance with this objective attention has been concentrated mainly on processes and operation of the factory and description of equipment is made as brief as possible with numerous references to other books where more detail is available The emphasis on operation rather than equipment has also been prompted by observation of quite a few factories in different countries where good equipment is giving less than its proper performance due to inefficient operation and supervision The book is

confined to the raw sugar process which has been the author's main interest Refining is discussed only to the extent required to explain refiners requirements concerning quality of raw sugar *Cane Sugar Handbook* James C. Richard Blanchard, Lois Farrell, 2023-07-28 *Chemistry and Processing of Sugarbeet and Sugarcane* M.A. Clarke, M.A. Godshall, 2013-10-22 The world of sugar production has undergone massive changes in the last decade which have resulted in the emergence of many technological changes as technologists strive to develop more efficient and cheaper processes This is the first book to be published for several years which describes the current state of sugar technology It presents the recent developments in beet and cane sugar manufacturing describes the chemistry of sugar processing and products and considers trends and future possibilities in sugar production systems and products The book comprises two sections beet and cane The overview of the crop and the production systems that begins each section serves as a framework for the papers that follow Several papers i e those on sucrose chemistry are relevant to both sugarcane and sugarbeet The authors of the papers are all invited speakers well known in their respective fields The book should be on the shelf of all sugarcane and sugarbeet factories and refiners around the world as well as those companies who are sugar users or who supply goods and services to the sugar industry It can also be used as a text by universities offering training courses in sugar processing technology
