Lillis, Jennifer Grafton, 2024-11-08 Performance measurement is a critical dimension of management control theory and practice and one of the most widely researched areas of management accounting The Research Handbook on Performance Measurement for Management Control provides the foundation for the next generation of research in management accounting on performance measurement by canvassing the contemporary landscape of performance measurement research and outlining future research opportunities Handbook of Research on Entrepreneurship in the Contemporary Knowledge-Based Global Economy Baporikar, Neeta, 2015-10-21 The rapid rise of knowledge based economies has revolutionized the perceptions and practices of globalized business Recent developments in engineering electronics and biotechnology have expanded the very definition of entrepreneurship in today s international market weaving discussions of enhanced connectivity and communication environmental sustainability and government policy changes into a complex multidimensional conversation The Handbook of Research on Entrepreneurship in the Contemporary Knowledge Based Global Economy provides a comprehensive survey of the most recent developments in the field of entrepreneurship highlighting their effects on information technology business networking knowledge production distribution and organization This timely publication features extensive coverage of the fast developing entrepreneurial field illuminating recent technological social and strategic innovations in language that is accessible for a worldwide audience of business educators researchers and students This authoritative text showcases research based articles on entrepreneurship for knowledge economies academic entrepreneurship women and entrepreneurship entrepreneurship education organizational learning ability innovations in industry agriculture and management and the evolution of a new all inclusive corporate culture *Management Scholarship and Organisational Change* Miriam Green, 2019-01-08 Change is a crucial and inescapable process for many organisations It remains a constant challenge for managers and many change management initiatives fail Burns and Stalker s seminal text on managing change The Management of Innovation has often been used as a basis for research in mainstream management journals and has been represented as an important theory in popular and long established management textbooks The issues raised in that book are still being grappled with by academics and practitioners today Miriam Green provides a critical analysis of the mainstream construction of knowledge on change management through an examination of representations of that text The main thesis of her book is that this literature though valuable does not provide a full picture Its objectivist

approach ignores the role of other factors raised in the original study. These factors include the effects of power, politics, resistance, and employee influence on the outcomes of managerial change strategies and on other organisational processes with important consequences for the understanding of change initiatives by both academics and practitioners. This is part of an ongoing debate in management studies and more widely in the social sciences about theoretical approaches and research methods. The originality of this book lies in its in-depth comparison of an entire monograph on organisations facing technological and commercial change with an equally in-depth analysis of the ways this work has been represented and used as a basis for teaching and research. It highlights the limitations of the exclusive use of one approach to explain the complications arising from organisational change. It challenges the scientific justification offered for that approach and supports arguments for more inclusive and sustainable scholarship of greater relevance to academics, managers, and other organisational stakeholders.
