## **Handbook Of Material Culture:**

Handbook of Material Culture Chris Tilley, Webb Keane, Susanne Kuechler, Mike Rowlands, Patricia Spyer, 2006-01-05 The study of material culture is concerned with the relationship between persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes an unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies

**The Cambridge Handbook of Material Culture Studies** Lu Ann De Cunzo, Catharine Dann Roeber, 2022-06-09 Material culture studies is an interdisciplinary field that examines the relationships between people and their things the production history preservation and interpretation of objects It draws on theory and practice from disciplines in the social sciences and humanities such as anthropology archaeology history and museum studies Written by leading international scholars this Handbook provides a comprehensive view of developments methodologies and theories It is divided into five broad themes embracing both classic and emerging areas of research in the field Chapters outline transformative moments in material culture scholarship and present research from around the world focusing on multiple material and digital media that show the scope and breadth of this exciting field Written in an easy to read style it is essential reading for students researchers and professionals with an interest in material culture

**The Oxford Handbook of Material Culture Studies** Dan Hicks, Mary C. Beaudry, 2010-09-02 Written by an international team of experts the Handbook makes accessible a full range of theoretical and applied approaches to the study of material culture and the place of materiality in social theory presenting current thinking about material culture from the fields of archaeology anthropology geography and science and technology studies

*Handbook of Material Culture* Christopher Y. Tilley, 2006 The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things

Handbook of Material Culture , 2006      The Routledge Handbook of Material Culture in Early Modern Europe Catherine

Richardson,Tara Hamling,David Gaimster,2016-09-13 The Routledge Handbook of Material Culture in Early Modern Europe marks the arrival of early modern material culture studies as a vibrant fully established field of multi disciplinary research The volume provides a rounded accessible collection of work on the nature and significance of materiality in early modern Europe a term that embraces a vast range of objects as well as addressing a wide variety of human interactions with their physical environments This stimulating view of materiality is distinctive in asking questions about the whole material world as a context for lived experience and the book considers material interactions at all social levels There are 27 chapters by leading experts as well as 13 feature object studies to highlight specific items that have survived from this period defined broadly as c 1500 c 1800 These contributions explore the things people acquired owned treasured displayed and discarded the spaces in which people used and thought about things the social relationships which cluster around goods between producers vendors and consumers of various kinds and the way knowledge travels around those circuits of connection The content also engages with wider issues such as the relationship between public and private life the changing connections between the sacred and the profane or the effects of gender and social status upon lived experience Constructed as an accessible wide ranging guide to research practice the book describes and represents the methods which have been developed within various disciplines for analysing pre modern material culture It comprises four sections which open up the approaches of various disciplines to non specialists Definitions disciplines new directions Contexts and categories Object studies and Material culture in action This volume addresses the need for sustained coherent comment on the state breadth and potential of this lively new field including the work of historians art historians museum curators archaeologists social scientists and literary scholars It consolidates and communicates recent developments and considers how we might take forward a multi disciplinary research agenda for the study of material culture in periods before the mass production of goods

**The Oxford Handbook of History and Material Culture** Ivan Gaskell,Sarah Anne Carter,2020 Most historians rely principally on written sources Yet there are other traces of the past available to historians the material things that people have chosen made and used This book examines how material culture can enhance historians understanding of the past both worldwide and across time The successful use of material culture in history depends on treating material things of many kinds not as illustrations but as primary evidence Each kind of material thing requires the application of interpretive skills appropriate to it These skills overlap with those acquired by scholars in disciplines that may abut history but are often relatively unfamiliar to historians including anthropology archaeology and art history Historians can adapt and apply the same skills they honed while studying more traditional text based sources even as they borrow methods from these fields

The Routledge Handbook of Material Culture in Early Modern Europe Catherine Richardson,Tara Hamling,David R. M. Gaimster,2017 Contradictions of Archaeological Theory Sandra Wallace,2012-01-30 Is current archaeological theory stuck at an impasse Sandra Wallace argues that archaeological theory has become mired as a result of logical and ontological

contradictions By showing that these contradictions are a result of common underlying philosophical assumptions and fallacies this book is able to show how a fresh approach to this discipline is necessary to resolve them even if this requires re-examining some of the tenants of orthodox archaeology This fresh approach is achieved by using Critical Realism as an underlabourer to philosophically evaluate archaeological theory Starting by assessing the historical impact of philosophy on the discipline and then looking at the current relationship between archaeology and the ontology of the material this book facilitates the construction of discipline specific theory by archaeologists The result is an approach to archaeology that allows both students and practitioners to free themselves from endemic contradictions and re-discover their approach to archaeological theory

**Personal Adornment and the Construction of Identity** Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation Personal Adornment and the Construction of Identity seeks to understand these artefacts not as signals of steady pre-existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played in human lives

**Appropriated Interiors** Deborah Schneiderman, Anca I. Lasc, Karin Tehve, 2021-12-30 Appropriated Interiors uncovers the ways interiors participate explicitly and implicitly in embedded cultural and societal values and explores timely emergent scholarship in the fields of interior design history theory and practice What is appropriate and inappropriate now These are terms with particular interest to the study of the interior Featuring thirteen original curated essays Appropriated Interiors explores the tensions between normative interiors that express the dominant cultural values of a society and interiors that express new changing and even transgressive values With case studies from the late eighteenth century to the twenty first century these historians theorists and design practitioners investigate the implications of interior design as it relates to politics gender identity spatial abstraction cultural expression

racial expression technology and much more An informative read for students and scholars of design history and theory this collection considers the standards assumptions codes and or conventions that need to be dismantled and how we can expand our understanding of the history theory and practice of interior design to challenge the status quo Remittances as Social Practices and Agents of Change Silke Meyer,Claudius Ströhle,2023-08-31 This open access book explores the transformative effects of remittances Remittances are conceptualized as flows of money objects ideas traditions and symbolic capital mapping out a cross border space in which people live work and communicate with multiple belongings By doing so they effect social change both in places of origin and destination However their power to improve individual living conditions and community infrastructure mainly results from global inequality Hence we challenge the remittance mantra and go beyond the migration development nexus by revealing dependencies and frictions in remittance relations Remittances are thus scrutinized in their effects on both social cohesion and social rupture By highlighting the transformative effects of remittance in the context of conflict climate change and the postcolonial we shed light on the future of transnational society Presenting empirical case studies from Ghana Burkina Faso Sri Lanka New Zealand Turkey Lebanon USA Japan and various European countries as well as historical North America and the Habsburg Empire we explore remittance relations from a range of disciplines including anthropology sociology history design architecture governance and peace studies In-Between Textiles, 1400-1800 Beatriz Marín-Aguilera,Stefan Hanß,2025-10-01 In Between Textiles is a decentred study of how textiles shaped disrupted and transformed subjectivities in the age of the first globalisation The volume presents a radically cross disciplinary approach that brings together world leading anthropologists archaeologists art historians conservators curators historians scientists and weavers to reflect on the power of textiles to reshape increasingly contested identities on a global scale between 1400 and 1800 Contributors posit the concept of in between textiles building upon Homi Bhabha s notion of in betweenness as the actual material ground of the negotiation of cultural practices and meanings a site identified as the battleground over strategies of selfhood and the production of identity signs troubled by colonialism and consumerism across the world In Between Textiles establishes cutting edge conversations between textile studies critical cultural theory and material culture studies to examine how textiles created and challenged experiences of subjectivity relatedness and dis location that transformed social fabrics around the globe **Egypt 2015: Perspectives of Research** Mladen Tomorad,Joanna Popielska-Grzybowska,2017-04-30 This volume presents proceedings from the Seventh European Conference of Egyptologists Zagreb Croatia 2015 Feeling Things Stephanie Downes,Sally Holloway,Sarah Randles,2018-01-13 This interdisciplinary essay collection investigates the various interactions of people feelings and things throughout premodern Europe It focuses on the period before mass production when limited literacy often prioritised material methods of communication The subject of materiality has been of increasing significance in recent historical inquiry alongside growing emphasis on the relationships between objects emotions and affect in archaeological and sociological

research The historical intersections between materiality and emotions however have remained under theorised particularly with respect to artefacts that have continuing resonance over extended periods of time or across cultural and geographical space *Feeling Things* addresses the need to develop an appropriate cross disciplinary theoretical framework for the analysis of objects and emotions in European history with special attention to the need to track the shifting emotional valencies of objects from the past to the present and from one place and cultural context to another The collection draws together an international group of historians art historians curators and literary scholars working on a variety of cultural literary visual and material sources Objects considered include books letters prosthetics religious relics shoes stone and textiles Many of these have been preserved in international galleries museums and archives while others have remained in their original locations even as their contexts have changed over time The chapters consider the ways in which emotions such as despair fear grief hope love and wonder become inscribed in and ascribed to these items producing emotional objects of significance and agency Such objects can be harnessed to create affirm or express individual relationships as for example in religious devotion and practice or in the construction of cultural communal and national identities

Games of History Apostolos Spanos, 2021-06-13

Games of History provides an understanding of how games as artefacts textual and visual sources on games and gaming as a pastime or a serious activity can be used as sources for the study of history. From the vast world of games the book's focus is on board and card games with reference to physical games sports and digital games as well. Considering culture society politics and metaphysics the author uses examples from various places around the world and from ancient times to the present to demonstrate how games and gaming can offer the historian an alternative often very valuable and sometimes unique path to the past. The book offers a thorough discussion of conceptual and material approaches to games as sources while also providing the reader with a theoretical starting point for further study within specific thematic chapters. The book concludes with three case studies of different types of games and how they can be considered as historical sources: the gladiatorial games chess and the digital game Civilization. Offering an alternative approach to the study of history through its focus on games and gaming as historical sources this is the ideal volume for students considering different types of sources and how they can be used for historical study as well as students who study games as primary or secondary sources in their history projects.
