Towards a Four-Tiered Model of Mediation Hugo Luz dos Santos, 2023-02-13 Underpinned by a hybrid methodology ranging from social sciences to human sciences this book parses mediation in four perspectives which stands as an

unparalleled methodological approach so far Mediation has long been tethered to piecemeal and haphazard approaches which have flatly failed to capture the gist of the uniqueness of this often poorly latched on and poorly understood dispute resolution mechanism This book argues that in order to fully grasp the richness of such dispute resolution mechanism mediation must be parsed in four tiers The first tier is the social dynamics of mediation The second tier is the cultural dynamics of mediation The third tier is the legal dynamics of mediation The fourth tier is the cross border and cross cultural dynamics of mediation Taken together the four tiers that premise the four tiered model of mediation seek to unlock the finding in view of which law and social reality are tightly interlocked In this vein it is the underlying social reality of a given jurisdiction that should dictate the design of a pre suit court connected mandatory mediation with an easy opt out a central claim of both social dynamics of mediation the first tier of the four tiered model of mediation and legal dynamics of mediation the third tier of the four tiered model of mediation **Multidisciplinary Dynamics of Mediation** Hugo Luz dos Santos,2025-09-15

This book casts an analytical eye on the legal dynamics of mediation premised on a multidisciplinary approach This is the very first book to meld mediation and applied psychology with a view to portray the myriad of cognitive biases with which the great bulk of legal actors grapple tussle with in mediation settings The overriding goal of this book is to provide a multidisciplinary comprehensive and full fledged framework to legal dynamics of mediation while emphasizing the paramount importance of incorporative mediation to protect the fundamental rights of the weakest disputant in the room something that has not been done yet This book is the very first one to provide a framework frame of reference to the usage of artificial intelligence in the remit of both mediation settings and Restorative Relationship Session RRS **Computational Social Psychology** Robin R. Vallacher,Stephen J. Read,Andrzej Nowak,2017-05-25

Computational Social Psychology showcases a new approach to social psychology that enables theorists and researchers to specify social psychological processes in terms of formal rules that can be implemented and tested using the power of high speed computing technology and sophisticated software This approach allows for previously infeasible investigations of the multi dimensional nature of human experience as it unfolds in accordance with different temporal patterns on different timescales In effect the computational approach represents a rediscovery of the themes and ambitions that launched the field over a century ago The book brings together social psychologists with varying topical interests who are taking the lead in this redirection of the field Many present formal models that are implemented in computer simulations to test basic assumptions and investigate the emergence of higher order properties others develop models to fit the real time evolution of people s inner states overt behavior and social interactions Collectively the contributions illustrate how the methods and tools of the computational approach can investigate and transform the diverse landscape of social psychology *Persistently Postwar* Blai Guarné,Artur Lozano-Méndez,Dolores P. Martinez,2019-03-27 From melodramas to experimental documentaries to anime mass media in Japan constitute a key site in which the nation s social memory is articulated disseminated and contested

Through a series of stimulating case studies this volume examines the political and cultural representations of Japan's past showing how they have reinforced personal and collective narratives while also formulating new cultural meanings both on a local scale and in the context of transnational media production and consumption Drawing upon diverse disciplinary insights and methodologies these studies collectively offer a nuanced account in which mass media function as much more than a simple ideological tool

Mackey,2025-01-28 A groundbreaking reinterpretation that draws on cognitive theory to show that belief wasn t absent from but rather was at the heart of Roman religion Belief and Cult argues that belief isn t uniquely Christian but was central to ancient Roman religion Drawing on cognitive theory Jacob Mackey shows that despite having nothing to do with salvation or

faith belief underlay every aspect of Roman religious practices emotions individual and collective cult action ritual norms social reality and social power In doing so he also offers a thorough argument for the importance of belief to other non Christian religions At the individual level the book argues belief played an indispensable role in the genesis of cult action and religious emotion However belief also had a collective dimension The cognitive theory of Shared Intentionality shows how beliefs may be shared among individuals accounting for the existence of written unwritten or even unspoken ritual norms Shared beliefs permitted the choreography of collective cult action and gave cult acts their social meanings The book also elucidates the role of shared belief in creating and maintaining Roman social reality Shared belief allowed the Romans to endow agents actions and artifacts with socio religious status and power In a deep sense no man could count as an augur and no act of animal slaughter as a successful offering to the gods unless Romans collectively shared appropriate beliefs about these things Closely examining augury prayer the religious enculturation of children and the Romans own theories of cognition and cult Belief and Cult promises to revolutionize the understanding of Roman religion by demonstrating that none of its features makes sense without Roman belief
