Nanomedicine Raj Bawa, Gerald F. Audette, Brian Reese, 2016-04-27 This unique handbook, 60 chapters, examines the entire product life cycle from the creation of nanomedical products to their final market introduction. While focusing on critical issues relevant to nanoproduct development and translational activities, it tackles topics such as regulatory science, patent law, FDA law, ethics, personalized medicine. Preventive and Predictive Genetics: Towards Personalised Medicine Godfrey

Grech, Iris Grossman, 2015-06-24 Pharmacogenomics supports personalized medicine by translating genome based knowledge into clinical practice, offering enhanced benefit for patients and health care systems at large. Current routine practice for diagnosing and treating patients is conducted by correlating parameters such as age, gender and weight with risks and expected treatment outcomes. In the new era of personalized medicine, the healthcare provider is equipped with improved ability to prevent, diagnose, treat and predict outcomes on the basis of complex information sources including genetic and genomic data. Targeted therapy and reliable prediction of expected outcomes offer patients access to better healthcare management by way of identifying the therapies effective for the relevant patient group, avoiding prescription of unnecessary treatment and reducing the likelihood of developing adverse drug reactions. *Detection and Analysis of SARS Coronavirus*

Chaudhery Mustansar Hussain, Sudheesh K. Shukla, 2021-07-13 Detection and Analysis of SARS Coronavirus. Detecting and analyzing the COVID 19 pandemic with biosensor technology. The highly contagious SARS CoV 2 pathogen has challenged health systems around the world as they struggle to detect and monitor the spread of the pathogen.
