Lost Opportunity Why Economic Reforms In Russia Have Not Worked:

Lost Opportunity Marshall I. Goldman, 1996 Undaunted by the potholed road the Russians are traveling towards a market economy Marshall Goldman here explains not only what has happened under Boris Yeltsin but also what is likely to happen next in the most enigmatic nation in the world Russian Energy Policy and Military Power Pavel K.

Baev, 2012-12-06 This book examines the interplay between energy policy and security policy under Vladimir Putin and his drive to re-establish Russia's greatness Assessing the internal contradictions of this policy the book argues that Russia's desire to strengthen its role of energy security provider is undermined by its inability to secure growth in production of oil and gas Further the pressing demand to channel more resources into the military industrial complex clashes with the growing need to invest in the energy complex and the priority granted to strategic forces deprives the conventional forces of strike power and strategic mobility In conclusion the author anticipates how these contradictions could be resolved and suggests three short scenarios for Russia's continuing transition in the next decade This book will be of interest to students of Russian politics European politics and international security **Strategic Partners** Jeanne Wilson, 2015-06-11 Russia's foreign policy experience in the first post Soviet decade was marked by disappointments as well as surprising turns Expectations that Russia would join the Western powers as an equal partner were frustrated while relations with the People's Republic of China warmed considerably Today Russia's relationship with China is an important component of its overall foreign policy orientation as the two states one greatly diminished the other clearly on the rise have found themselves sharing an interest in curbing the power of the United States In analyzing Russia's evolving foreign policy vis-à-vis China the author takes into account the legacy of Soviet era precedents the simultaneous processes of economic policy change and integration into global economic structures and military relations By shedding light on the role of political realism decision makers and exogenous factors in Russian foreign policy this analysis of an important bilateral relationship contributes to the larger project of understanding international relations and the dynamics of domestic and foreign policy change

Comparative Economic Systems: v. 1 Richard L. Carson, 2015-03-02 This book focuses on advanced market capitalism that examines the economies of the United States Japan France Sweden and Germany It represents an effort to analyze and understand economic systems by using the standard principles of supply demand and cost analysis along with property rights

Turkey and the European Union Armand Clesse, 2004 *The State After Communism* Timothy J. Colton, Stephen Holmes, 2006 The Soviet dictatorship was a strong state committed to dominating and transforming society in the name of a utopian ideology When the communist regime crumbled and the post Soviet countries committed to democracy most observers took for granted that their state structures would be effective agents of the popular will Russia's experience demonstrates that this assumption was overly optimistic This book based on a major collaborative research project with American and Russian scholars shows that state capacity strength and coherence were highly problematic after communism

which had major consequences for particular functions of government and for the entire process of regime change Eleven respected contributors examine governance in post Soviet Russia in comparative context investigating the roots characteristics and consequences of the crisis as a whole and its manifestations in the specific realms of tax collection statistics federalism social policy regulation of the banks currency exchange energy policy and parliamentary oversight of the bureaucracy

Economic Dynamics in Transitional Economies Bruno Sergi, 2020-07-24 Learn more about the transitional economies of Central and Eastern Europe This book examines the economic dynamics of Central and Eastern European post Communist countries It illuminates the paths these countries are taking toward restructuring their markets increasing international trade and bettering their connections with the European Union and other countries Beginning with a comparative analysis of the three P governments Pigouvian Partizan and Paternalistic and continuing with a discussion of the interrelated political and economic difficulties of transition author Bruno Sergi proposes a surprising solution Inspired by the Bruxelles consensus he proposes that the European Commission should become a fourth P government replacing the role formerly played by the Washington consensus in the restructuring of post Communist economies *Economic Dynamics in Transitional Economies* also explores regional comparative macroeconomics the aftereffects of the Washington Consensus integration of Eastern and Western European economies interrelations between national and regional monetary activity political and economic policy reform involvement of European Union member countries We are living in historic times and *Economic Dynamics in Transitional Economies* will be a welcome guide to the rough roads ahead This thorough assessment of current political and economic realities will stimulate debate about new European paradigms the role of the European Union and the difficulties of post Communist transition These issues promise to be vital to the region's success in the new century

Russia's Bitter Path to Modernity Alexander Chubarov, 2001-01-01 Will it follow the model of the Western capitalist democracies as those who applied the economic shock therapy of the early 90s hoped or will it chose its own distinct path of development In this history of Russia from 1917 to the present Alexander Chubarov teases out certain themes developed in his previous book on tsarist Russia *The Fragile Empire* One of the key factors to Russia's distinctiveness is its halfway location in the center of the Eurasian landmass This lends an inevitability to the traditional cultural schism between Westernizing reformers and Slavophiles Neither approach says Chubarov will work on its own Chubarov offers a balanced view abstaining from narrow ideologically biased assessments and examines the triumphs yes and failures of Russia's Soviet development within Russia's own cultural and historical context Without ever minimizing the brutalities of the Soviet period the state terror the collectivizations the labor camps the deportations of whole peoples Chubarov demonstrates much continuity between tsarist and Soviet Russia with the latter often repeating the former's mistakes Russia says Chubarov cannot turn its back on its Soviet experience Far from being a blind alley or aberrant phase the Soviet period was an organic part of Russia history and was largely successful in turning Russia and most of the other Soviet republics into modern states

Transforming China Peter Nolan, 2004-05-11 These essays both enhance an understanding of China's immense success in meeting these challenges in the past and provide an indication of the challenges that still lie ahead. China's system reforms have been described as groping for stones to cross the river. The journey across the river is far from over and the other bank is only dimly visible.

Russian Politics and Society Richard Sakwa, 2008-04-10 Having been fully revised and updated to reflect the considerable changes in Russia over the last decade, the fourth edition of this classic text builds on the strengths of the previous editions to provide a comprehensive and sophisticated analysis on Russian politics and society. New to this edition: extended coverage of electoral laws, party development and regional politics; new chapter on the phoney democracy period 1991-93; historical evaluation of Yeltsin's leadership; full coverage of Putin's presidency; discussion of the development of civil society and the problems of democratic consolidation; latest developments in the Chechnya conflict; more on foreign policy issues; the re-introduction of the Russian Constitution as an appendix; an updated Select Bibliography; more focus on the challenges facing Russia in the twenty-first century. Written in an accessible and lively style, this book is packed with detailed information on the central debates and issues in Russia's difficult transformation. This makes it the best available textbook on the subject and is essential reading for all those concerned with the fate of Russia and with the future of international society.

The Challenge of Revolution Vladimir Aleksandrovich Mau, Irina Starodububrovskaya, I. V. Starodubrovskai, 2001 This volume provides an challenging and controversial explanation of the recent events in Russia. It examines the causes, processes and consequences of Russia's recent political development. Drawing on and criticizing the existing literature, the book also shows how the recent Russian experience casts light on general theories of revolution and comparative political developments. The transformation in Russia is usually compared with transformations in other post-communist countries. The authors argue that the Russian transformation should be explained in the logic of the great revolutions of the past such as the English Civil War, the French Revolution and the Bolshevik Revolution. The difficulties and inconsistency of Russian reforms are usually explained as a result of mistakes made by reformers. This book argues, however, that these problems should be considered as a natural consequence of the weak state. In revolution, the weakness of state power is inevitable, resulting from social fragmentation, property rights transformation, changes in the interests of different social groups. Hence, the authors argue that most of the transitional problems in Russia were unavoidable. The authors go on to argue that revolutions are usually considered as rapid change made through violence. However, the spontaneous character of change in the situation of a weak state is a much more important feature of any revolution than violence. The book contains unique interviews with four leaders of the Russian transformation: Mikhail Gorbachev, Alexander Yakovlev, Yegor Gaidar and Gennadii Burbulis, as well as the personal experience of the authors who were deeply involved in the practical process of Russian transformation.

Revolution From Above David Kotz, Fred Weir, 2013-04-15 Controversially, this book argues that the ruling party-state elite in the USSR itself moved to dismantle the old system. Topics discussed include the beginnings of

economic decline in 1975 Gorbachev's efforts to democratize and decentralize the complex political battle through which the coalition favouring capitalism took power the flaws in economic policies intended to rapidly build capitalism the surprising resurgence of Communism Research includes interviews with over 50 former Soviet government and Communist party leaders policy advisors new private businessmen trade union leaders and intellectuals Contemporary Russia as a Feudal Society V. Shlapentokh,Joshau Woods,2007-11-26 The book offers a theoretical discussion of the feudal model and a preliminary application of the model to post Soviet Russia In addition to a review of the feudal model as an ideal type the author explains the analytical benefits of drawing comparisons between countries and across historical contexts Specifically contemporary Russia is compared to Western European countries during the Middle Ages and to the Soviet period in Russian history The book is devoted to illuminating the most important political social and economic characteristics of contemporary Russian society Industrial Transformation in Eastern Europe in the Light of the East Asian Experience Jeffrey Henderson,Karoly Balaton,Gyorgy Lengyel,2016-07-27 Since 1989 the postcommunist societies of Eastern Europe have been subject to policy advice and political and economic pressure which assumes that the development of free market economies is the best route to economic growth and prosperity The contributors to this volume take issue with this proposition Though working from different theoretical perspectives with different interests they collectively argue that there are better ways to build dynamic and prosperous industrial economies in Eastern Europe than encouraging the respective societies of the region to ape the contents and swallow the myths of the Anglo American form of capitalism The contributors to this volume are among the leading authorities on economic transformation in Eastern Europe *Global Long-term Economic Growth and the Economic Transformation of Poland and Eastern Europe* Stanisław Gomulka,2023 One of the characteristic facts concerning the catching up countries is the exceptionally large variation in their per capita annual rate of growth from about zero to about 10% The papers published in this monograph show that this rate is strongly dependent on the rate of investment the quality of the labour force and the quality of institutions The rate of investment is in turn dependent on the rate of domestic savings In Poland domestic savings are shown to have been and continue to be very low by international standards The trend rate of growth of about 3.7% has been about 2 pp higher than that of the most developed economies mainly thanks to the development of modern market institutions and a new private sector and partly thanks to foreign direct investments and a significant inflow of finance from the European Union EU The data also show that by far the least successful transformation in Eastern Europe has taken place in Ukraine Author's Introduction Our discussion is limited to the Technology Frontier Area TFA of the world The central question is how the area's innovation rate changes over time in the course of centuries The analysis indicates that the pattern of change of the innovation rate over time may be eventually hat shaped This Hat Shape Relationship is an empirical law that is given a theoretical interpretation It is in part a prediction based on the author's model of innovation and growth Its acceleration and steady growth segments correspond well to the

past reality Its slowdown part is the central thesis of the book **The Institutional Transition of China's Township and Village Enterprises** Hongyi Chen, 2017-11-22 This title was first published in 2000 This work provides a new insight into China's township and village enterprises TVEs It views the governance structure of TVEs as effectively combining the comparative advantage of local government officials in external management and of dual firm managers in internal management to overcome imperfections in both market and government during the transitional period Through extensive field investigation analysis and case studies this work shows that the governance structure of TVEs has been evolving during the past fifteen years To adapt to the changing environment TVEs have continuously innovated firm contractual form from a government official dominant fixed wage form to a partnership style profit sharing form then to a privatization oriented fixed rent form This work develops a complete model to explain how the central government's partial reform efforts in market liberalization have become the driving force to induce the contractual form innovation and to explicate how heterogeneity in firms technical structures and in local economic settings may affect local government's decisions regarding contractual form innovation Using the author's unique data set the model simulations predict that the development in the whole market system will result in the diffusion of contractual form innovation and lead to an induced privatization in this sector The following empirical studies show this to be a powerful prediction and the progress toward such induced privatization can be expected in China in near future This research work provides a rich empirical study on China's institutional transition towards a market system It explains how a bottom up endogenous instead of top down exogenous property rights reform can be realized in transitional economies This work will serve as a valuable reference for researchers and students in economics economic development and institutional economics and especially for those interested in research Karl W. Ryavec, 2005 This unique study provides an original nitty gritty view of the true nature and operation of Russia's state bureaucracy from the imperial period to the present including the Putin presidency The only book length exploration of the problems and deficiencies of Russian bureaucracy since tsarist times this detailed work sheds important new light on Russian public administration an often overlooked but key barrier to Russian normalization and democratization *Prologue* , 1995

Energy, Environment and Geopolitics in Eurasia Norman A. Graham, Şuhnaz Yılmaz, 2023-12-22 This book advances our understanding of security and its intricate interactions with geopolitics and the environment in Eurasia Norman A. Graham and Şuhnaz Yılmaz focus on Eurasia where the energy water food nexus has emerged as a vital aspect of political economy and increasingly as a decisive factor for human security As clearly revealed during the Russian invasion of Ukraine this nexus rests on a precarious balance Graham and Yılmaz argue that Central Eurasia is currently Running on Empty and highlight the key environmental challenges including water quantity and quality and food security The authors draw on their extensive fieldwork in countries including Azerbaijan China Georgia Kazakhstan the Russian Federation Turkey and Uzbekistan to assess the interests and impact of pivotal actors and evaluate the competition and complementarities of these

actors regarding water energy food security and foreign policy imperatives They also examine the broader interaction and implications of security at multiple levels by analyzing the local national and international factors in light of geopolitical and environmental challenges Taking a novel and highly interdisciplinary approach this book will be an important resource for students and scholars of energy and food security political economy international conflict and cooperation and natural resource politics

Russia in the Twentieth Century David R. Marples, 2014-01-14 The history of Russia as the natural successor to the Soviet Union is of crucial importance to understanding why communism ultimately lost out to Western democracy and the free market system David Marples presents a balanced overview of 20th century Russian history and shows that although contemporary Russia has retained many of the practices and memories of the Soviet period it is not about to revert back to the Soviet example
