that addresses the following questions What are the epistemological barriers possibilities encountered when disability is brought into the intellectual ambit of curriculum theory What would curriculum theory look like if disabled people re imagined the curriculum What is the link between curriculum and conceptions of specialized programming for students identified as disabled And most critically how do approaches to schooling and conceptions of ability within curriculum studies enact forms of racism sexism and heteronormativity as well as are complicit in the construction and removal of the disabled body from mainstream education This book was originally published as a special issue of the journal Curriculum Inquiry
