gender women's bodies and work Through the lens of the body and from a feminist perspective Gatrell considers women's work from two angles the first conceptualizing the labour of maternity as women's work the second exploring the dynamics between women's bodies and employment The author suggests that maternity constitutes women's work with some women expected to produce children while others are criticised for giving birth She calls for the re-conceptualization of pregnancy birth and breastfeeding as forms of labour asserting that mothers are required to perform particular forms of body work in order to comply with ideals of good mothering and norms of the workplace The book observes that these are conflicting requirements which place irreconcilable demands on women and constrain women's choice At the heart of *Embodying Women's Work* is the idea that women's bodies are central to gendered power relations and remain a negotiated site of power between men and women within late modern society The book considers women's bodies in the context of different forms of paid work discussing how far women remain at an economic disadvantage in comparison with male workers *Embodying Women's Work* is of key interest for students and academics of sociology social welfare and women's studies
