Children's Play, Pretense, and Story Susan Douglas, Lesley Stirling, 2015-12-21 At the heart of this volume is the recognition that children s engagement with play and story are intrinsically and intricately linked The contributing authors

share a passionate interest in the development and well being of children in particular through their use of imagination and adaptation of the everyday into play and stories Following these principles the volume explores the connections between play story and pretense with regard to many cultural and contextual factors that influence the way these elements vary in children s lives In a departure from earlier collections on play and story the authors take a particular focus on normative as compared with atypical development This collection begins with an approach to understanding the developmental relationship between play and story which recognizes their similarities while acknowledging their differences Much of the collection addresses pretend play and story in children with autism spectrum disorder an understudied but important group for consideration as these dimensions of their lives and development have often been considered problematic The volume also includes sections on play and story in classroom settings and play and story across cultures including non English speaking environments such as Israel Romania China and Mexico It concludes with a discussion of how play differs across sociocultural and economic contexts making a unifying claim for the importance of play in children s lives but also calling for an understanding of what play means to very different groups of children

Helmers,1994-11-22 This is a book about the usual teacher student relationship in composition courses It disrupts and rewrites the commonplace conception of the relationship by revealing the uneven ways in which power is deployed in and around the classroom And it offers a responsible alternative The author not only offers teachers a way of learning about power relations at their own specific sites but also works towards a more equitable redistribution Drawing from testimonials about teaching practice published in the journal *College Composition and Communication* Helmers explores conventions in this form of writing that portray students in a negative light and show the teacher to be powerfully triumphant in his or her creative pedagogy Several prevalent modes of representation are discussed in the book all of which define the students as distinctly different from the teachers in other words as an other The texture of the work is rich because Helmers takes an enormous amount of post structuralist theory and recasts it in the sphere of the teacher student relationship itself an underexplored realm
