L'université Nancy Lorraine Histoire Perspectives:

Hypotheses and Perspectives in the History and Philosophy of Science Raffaele Pisano, Joseph Agassi, Daria Drozdova, 2017-11-23 To commemorate the 50th anniversary of his passing in 2014 this special book features studies on Alexandre Koyr 1892 1964 one of the most influential historians of science of the 20th century who re evaluated prevalent thinking on the history and philosophy of science In particular it explores Koyr s intellectual matrix and heritage within interdisciplinary fields of historical epistemological and philosophical scientific thought Koyr is rightly noted as both a versatile historian on the birth and development of modern science and for his interest in philosophical questions on the nature of scientific knowledge In the 1940s and 1950s his activities in the United States established a crucial bridge between the European historical tradition of science studies and the American academic environments and an entire generation of historians of science grew up under his direct influence The book brings together contributions from leading experts in the field and offers much needed insights into the subject from historical nature of science and philosophical perspectives It provides an absorbing and revealing read for historians philosophers and scientists alike *Process Engineering Renewal 1* Éric Schaer, Jean-Claude André, 2020-04-09 Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries Its success is incontrovertible with the exponential increase in techniques and innovations Rapid advances in new technologies such as artificial intelligence as well as current societal needs sustainable development climate change renewable energy the environment are developments that must be taken into account in industrial renewal *Process Engineering Renewal 1* the first volume of three focuses on training demonstrating the need for innovation in order for the field to have a framework that is sustainable in a highly changeable world **Universitätskulturen - L'Université en perspective - The Future of the University** Peter Hayes, Jean El Gammal, 2014-03-15 Globalisierung Evaluation Exzellenz Angesichts der gro en Umw lungen vor denen die Universit tslandschaften international stehen widmet sich das Jahrbuch des Frankreichszentrums 2011 den universit ren Strukturen in Deutschland Frankreich und den USA Historische und zeitgen ssische gesellschaftliche Herausforderungen f r die Universit ten werden anhand von Fallstudien beleuchtet und gegenw rtigen Diskursen gegen bergestellt Dabei wird der Bogen geschlagen vom mittelalterlichen Erbe und der geschichtlichen Entwicklung der heutigen Universit tssysteme ber die Ver nderung studentischer Lebensstile und die Rolle der Universit ten f r die Elitenbildung bis hin zu Reformen Evaluationen und Rankings aus US amerikanischer und europ ischer Sicht **Science Cultures in a Diverse World: Knowing, Sharing, Caring** Bernard Schiele, Xuan Liu, Martin W. Bauer, 2021-09-13 Science and technology culture is now more than ever at the very heart of the social project and all countries to varying degrees participate in it raising scientific literacy improving the image of the sciences involving the public in debates and encouraging the young to pursue careers in the sciences Thus the very destiny of any society is now entwined with its ability to develop a genuine science and technology

culture accessible for participation not only to the few who by virtue of their training or trade work in the science and technology fields but to all thereby creating occasions for society to debate and to foster a positive dialogue about the directions of change and future choices This book organized on the theme of knowing sharing caring new insights for a diverse world which was derived from the observation that globalization rests upon diversity diversity of contexts publics research strategies and new innovating practices and aims to stimulate exchanges discussions and debates to initiate a reflection conducive to decentring and to be an opportunity for enrichment by providing the reader with means to achieve the potentialities of that diversity through a comparison of the visions that underpin the attitudes of social actors the challenges they perceive and the potential solutions they consider Thus this book aims first and foremost to raise questions in such a manner that readers so stimulated will feel compelled to contribute and will do so In this spirit however significant the results presented and shared are less important than the questions they seek to answer How are we to rethink the diffusion the propagation and the sharing of scientific thought and knowledge in an ever more complex and diverse world What to know What to share How do we do it when science is broken down across the whole spectrum of the world s diversity The book is recommended for those who are interested in science communication and science cultures in the new media era in contemporary social dynamics and in the evolution of the role of the state and of institutions It is also an excellent reference for researchers engaging in science communication public understanding of science cultural studies science and technology museum science society relationship and other fields of humanities and social sciences

New Perspectives on the History of Life Sciences and Agriculture Denise Phillips, Sharon Kingsland, 2015-02-12 This volume explores problems in the history of science at the intersection of life sciences and agriculture from the mid eighteenth to the mid twentieth century Taking a comparative national perspective the book examines agricultural practices in a broad sense including the practices and disciplines devoted to land management forestry soil science and the improvement and management of crops and livestock The life sciences considered include genetics microbiology ecology entomology forestry and deal with US European Russian Japanese Indonesian Chinese contexts The book shows that the investigation of the border zone of life sciences and agriculture raises many interesting questions about how science develops In particular it challenges one to re examine and take seriously the intimate connection between scientific development and the practical goals of managing and improving perhaps even recreating the living world to serve human ends Without close attention to this zone it is not possible to understand the emergence of new disciplines and transformation of old disciplines to evaluate the role and impact of such major figures of science as Humboldt and Mendel or to appreciate how much of the history of modern biology has been driven by national ambitions and imperialist expansion in competition with rival nations

A Local Perspective on Lexicography Marinela Burada, Raluca Sinu, 2020-05-04 This book is concerned with dictionary making and dictionary research carried out in Romania The outcome of extensive hands on experience in dictionary making and dictionary research

the volume addresses a range of culture specific topics related to both dictionary as process and dictionary as product It reflects the interests and concerns of all the stakeholders on the lexicographic continuum theorists practitioners and dictionary users The topics covered here encompass a number of macro and micro structural aspects relating to paper and online monolingual and bilingual general and specialized reference works They create a composite picture of the lexicographic landscape in Romania set against a wider sociocultural backdrop It is this ecology of dictionary making that helps explain the priorities influences pressures and challenges that have shaped the local dictionary culture The book will also provide researchers practitioners teachers and students with a clearer view of the peculiarities of the dictionary

Poincaré, Philosopher of Science María de Paz,Robert DiSalle,2014-04-11 This volume presents a selection of papers from the Poincar Project of the Center for the Philosophy of Science University of Lisbon bringing together an international group of scholars with new assessments of Henri Poincar s philosophy of science both its historical impact on the foundations of science and mathematics and its relevance to contemporary philosophical inquiry The work of Poincar 1854 1912 extends over many fields within mathematics and mathematical physics But his scientific work was inseparable from his groundbreaking philosophical reflections and the scientific ferment in which he participated was inseparable from the philosophical controversies in which he played a pre eminent part The subsequent history of the mathematical sciences was profoundly influenced by Poincar s philosophical analyses of the relations between and among mathematics logic and physics and more generally the relations between formal structures and the world of experience The papers in this collection illuminate Poincar s place within his own historical context as well as the implications of his work for ours *Science after the Practice Turn in the Philosophy, History, and Social Studies of Science* Léna Soler,Sjoerd Zwart,Michael Lynch,Vincent Israel-Jost,2014-03-21 In the 1980s philosophical historical and social studies of science underwent a change which later evolved into a turn to practice Analysts of science were asked to pay attention to scientific practices in meticulous detail and along multiple dimensions including the material social and psychological Following this turn the interest in scientific practices continued to increase and had an indelible influence in the various fields of science studies No doubt the practice turn changed our conceptions and approaches of science but what did it really teach us What does it mean to study scientific practices What are the general lessons implications and new challenges This volume explores questions about the practice turn using both case studies and theoretical analysis The case studies examine empirical and mathematical sciences including the engineering sciences The volume promotes interactions between acknowledged experts from different often thought of as conflicting orientations It presents contributions in conjunction with critical commentaries that put the theses and assumptions of the former in perspective Overall the book offers a unique and diverse range of perspectives on the meanings methods lessons and challenges associated with the practice turn *The Theory of Mind Under Scrutiny* Teresa Lopez-Soto,Alvaro Garcia-Lopez,Francisco J. Salguero-Lamillar,2024-01-01 This book is a call to expand and diversify our

approach to the study of the human mind in relation to the Theory of Mind It proposes that it is necessary to combine cross disciplinary methods to arrive at a more complete understanding of how our minds work Seeking to expand the discussion surrounding the Theory of Mind beyond the field of psychology and its focus on our capacity to ascribe mental states to other people this volume collects evidence and research to point to a more holistic understanding of our own minds the minds of others behavior language and reasoning This book therefore illuminates the conceptual intricacy underlying the Theory of Mind It posits that a wide scope is necessary to make a breakthrough in scientific research towards a full understanding of the nature function and development of our capacity to converge on biological processes of the brain towards consciousness emotion awareness and cognition The volume presents methods results critiques and models intended to provoke debates in various academic disciplines It is of interest to scholars working in psychology neuroscience philosophy of mind and artificial intelligence

Thinking with Women Philosophers Eléonore Le Jallé, Audrey Benoit, 2022-10-03 This book focuses on some English speaking women philosophers who have been major actors since the 20th century in the field of practical philosophy namely political and social philosophy feminist approaches to philosophy moral psychology the theory of action and ethics The book explores topics linked to the main aspects of the thought of those philosophers i e Elizabeth Anscombe Judith Butler Philippa Foot Nancy Fraser Carol Gilligan and Martha Nussbaum Six women French commentators have written a chapter on each of those women anglo american philosophers creating a dialogue as they think with them elaborating their own positions in their respective fields

La correspondance de jeunesse d'Henri Poincaré Laurent Rollet, 2017-05-22 Ce cinquième volume de la correspondance d'Henri Poincaré rassemble l'ensemble des lettres envoyées par le mathématicien sa famille durant ses années de formation l'école polytechnique puis l'école des mines de Paris De 1873 1878 Poincaré écrit plus de 300 lettres sa mère sa sœur et son père Une part importante de cette correspondance concerne ses études pour devenir ingénieur Poincaré évoque ainsi les différents événements importants ou anodins qui ponctuent son parcours de formation dans les deux écoles les cours et les examens les voyages d'études en France et l'étranger les relations avec les professeurs les rituels étudiants la naissance de ses ambitions mathématiques Cependant ces lettres de jeunesse permettent également de reconstituer les réseaux familiaux et amicaux de Poincaré ainsi que l'univers socio culturel dans lequel il évolue dans les années 1870 Elles fourmillent donc de récits pittoresques sur ses visites mondaines sur ses relations avec sa sœur ou ses amis d'enfance sur ses loisirs ou sur ses convictions politiques Ce corpus de lettres est constitué presque intégralement de lettres écrites par Poincaré et leur lecture permet de découvrir un autoportrait inédit et saisissant du futur mathématicien Il intéressera autant les historiens des mathématiques que les biographes de Poincaré les historiens de l'enseignement ou le grand public

Women's Contemporary Readings of Medieval (and Modern) Arabic Philosophy Saloua Chatti, 2022-06-27 This book explores a large variety of topics involved in Arabic philosophy It examines concepts and issues relating to logic and mathematics as well as metaphysics ethics and aesthetics These topics are all studied by different Arabic philosophers

and scientists from different periods ranging from the 9th century to the 20th century and are representative of the Arabic tradition This is the first book dealing with the Arabic thought and philosophy and written only by women The book brings together the work and contributions of an international group of female scholars and researchers specialized in the history of Arabic logic philosophy and mathematics Although all authors are women the book does not enter into any kind of feminist trend It simply highlights the contributions of female scholars in order to make them available to the large community of researchers interested in Arabic philosophy and to bring to the fore the presence and representativeness of female scholars in the field

Arsyad al-Banjari's Insights on Parallel Reasoning and Dialectic in Law Muhammad Iqbal, 2022-06-16 This book provides an epistemological study of the great Islamic scholar of Banjarese origin Syekh Muhammad Arsyad al Banjari 1710 1812 who contributed to the development of Islam in Indonesia and in general Southeast Asia The work focuses on Arsyad al Banjari s dialectical use and understanding of qiy s or correlational inference as a model of parallel reasoning or analogy in Islamic jurisprudence This constituted the most prominent instrument he applied in his effort of integrating Islamic law into the Banjarese society This work studies how Arsyad al Banjari integrates jadal theory or dialectic in Islamic jurisprudence within his application of qiy s The author develops a framework for qiy s which acts as the interface between jadal dialogical logic and Per Martin L f s Constructive Type Theory CTT One of the epistemological results emerging from the present study is that the different forms of qiy s applied by Arsyad al Banjari represent an innovative and sophisticated form of reasoning The volume is divided into three parts that discuss the types of qiy s as well their dialectical and argumentative aspects historical background and context of Banjar and demonstrates how the theory of qiy s comes quite close to the contemporary model of parallel reasoning for sciences and mathematics developed by Paul Bartha 2010 This volume will be of interest to historians and philosophers in general and logicians and historians of philosophy in particular

Theory and Practice in the Interdisciplinary Production and Reproduction of Scientific Knowledge Olga Pombo, Klaus Gärtner, Jorge Jesuino, 2023-01-10 This book addresses the urgent need for a large and systematic analysis of current interdisciplinary ID research and practice It demonstrates how ID is essentially a cognitive phenomenon something different from the frivolous and inconsequential attempt of trying to overcome the disciplinary competencies and exigencies By ID the authors show that it is a manifestation of the transversal rationality that underlies current scientific activity It is the very progress of specialized disciplines that requires interdisciplinary new research practices and new forms of articulation between domains something that has a strong impact on the traditional disciplinary structure of scientific and educational institutions Divided into two parts the book presents a conceptual framework as well as several case studies on ID practices The book aims at covering three main themes It contributes to the stabilization of ID meaning and characterizes the main ID theorizations which have been proposed until now It builds an innovative and broad understanding of the several ID determinations as an essentially cognitive phenomenon and of its institutional implications at the level of disciplinary

structures and curricular organization Finally it distinguishes and maps the diversity of ID procedures and practices which are being used and tested by contemporary scientific and educational institutions This book is addressed to philosophers scientists and every one interested in science production and reproduction including science teaching *The War of Guns and Mathematics* David Aubin, Catherine Goldstein, 2014-10-07 For a long time World War I has been shortchanged by the historiography of science Until recently World War II was usually considered as the defining event for the formation of the modern relationship between science and society In this context the effects of the First World War by contrast were often limited to the massive deaths of promising young scientists By focusing on a few key places Paris Cambridge Rome Chicago and others the present book gathers studies representing a broad spectrum of positions adopted by mathematicians about the conflict from militant pacifism to military scientific or ideological mobilization The use of mathematics for war is thoroughly examined This book suggests a new vision of the long term influence of World War I on mathematics and mathematicians Continuities and discontinuities in the structure and organization of the mathematical sciences are discussed as well as their images in various milieux Topics of research and the values with which they were defended are scrutinized This book in particular proposes a more in depth evaluation of the issue of modernity and modernization in mathematics The issue of scientific international relations after the war is revisited by a close look at the situation in a few Allied countries France Britain Italy and the USA The historiography has emphasized the place of Germany as the leading mathematical country before WWI and the absurdity of its postwar ostracism by the Allies The studies presented here help explain how dramatically different prewar situations prolonged interaction during the war and new international postwar organizations led to attempts at redrafting models for mathematical developments **Applying Reflective Equilibrium** Tanja Rechnitzer, 2022-07-01 This open access book provides the first explicit case study for an application of the method of reflective equilibrium RE using it to develop and defend a precautionary principle It thereby makes an important and original contribution to questions of philosophical method and methodology The book shows step by step how RE is applied and develops a methodological framework which will be useful for everyone who wishes to use reflective equilibrium With respect to precautionary principles the book demonstrates how a rights based precautionary principle can be constructed and defended The case study succeeds in demonstrating that RE can be successfully applied and puts real constraints on the justification process This is all the more remarkable as the case study was designed as an open ended process without presupposing any specific results This book will be highly relevant both to people interested in philosophical methodology and epistemology as well as to researchers who are interested in using philosophical methods and tools and applying them to practical problems **Discoverability** Lorenzo Magnani, 2022-05-20 The book analyses the concept of discoverability and some current epistemological problems related to it with a special attention to science It shows that discoverability is closely related to the sustainability of human creativity in an eco cognitive perspective Advocating the need of an integral ecology

and leveraging the important concept of abduction it demonstrates that an ecology of human creativity should have priority over other needs i.e. that the first ecological duty is to protect and sustain discoverability Enhancing discoverability will protect human creativity and it is exactly human creativity a form of innovative abductive cognition that can promote the implementation of the other kinds of ecology The author guides readers through a comprehensive discussion on the concept of discoverability eco cognitive situatedness and eco cognitive openness and closure alike By describing some key real world examples he highlights the main challenges that are currently posed to human creativity and epistemic integrity He also describes future eco cognitive settings discussing the problem of overcomputationalism and suggesting a reinterpretation of the role of human knowledge Overall this book fills an important gap in the literature on the nexus abduction creativity discovery offering a source of inspiration to philosophers epistemologists and cognitive scientists Yet it also addresses researchers in other disciplines interested in the problems of scientific discovery and epistemic integrity of research

The Jacobites and the Grand Tour J  r  my Filet, 2025-04-22 In the first monograph to fully examine the intersecting networks of Jacobites and travellers to the continent Filet considers how small states used official diplomacy and deployed soft power embodied by educational academies to achieve foreign policy goals This work uses little known archival materials to explain how and why certain small states secretly supported the Jacobite cause during the crucial years surrounding the 1715 rising while others stayed out of Jacobite affairs At the same time the book demonstrates how early modern small states sought to cultivate good relations with Britain by attracting travellers as part of a wider trend of ensuring connections with future diplomats or politicians in case a Stuart restoration never came This publication therefore brings together a study of Britain small states Jacobitism and educational travel in its nexus at continental academies

The Meaning of Something Fosca Mariani Zini, 2022-11-09 This innovative volume investigates the meaning of something in different recent philosophical traditions in order to rethink the logic and the unity of ontology without forgetting to compare these views to earlier significant accounts in the history of philosophy In fact the revival of interest in something in the 19th and 20th centuries as well as in contemporary philosophy can easily be accounted for it affords the possibility for asking the question what is there without engaging in predefined speculative assumptions The issue about something seems to avoid any naive approach to the question about what there is so that it is treated in two main contemporary philosophical trends material ontology which aims at taking inventory of what there is of everything that is and formal ontology which analyses the structural features of all there is whatever it is The volume advances cutting edge debates on what is the first et the most general item in ontology that is to say something because the relevant features of the conceptual core of something are non nothingness otherness Something means that one being is different from others The relationality belongs to something Therefore the volume advances cutting edge debates in phenomenology analytic philosophy formal and material ontology traditional metaphysics

Performing women Susannah Crowder, 2018-08-31 This book takes on a key problem in the history of drama the

exceptional staging of the life of Catherine of Siena by a female actor and a female patron in 1468 Metz Exploring the lives and performances of these previously anonymous women the book brings the elusive figure of the female performer to centre stage It integrates new approaches to drama gender and patronage with a performance methodology to explore how the women of fifteenth century Metz enacted varied kinds of performance that extended beyond the theatre For example decades before the 1468 play Joan of Arc returned from the grave in the form of an impersonator named Claude Offering a new paradigm of female performance that positions women at the core of public culture Performing women is essential reading for scholars of pre modern women and drama and is also relevant to lecturers and students of late medieval performance religion and memory
