**Lying and Deception in Everyday Life** Michael Lewis, Carolyn Saarni, 1993-02-05 I speak the truth not so much as I would but as much as I dare Montaigne All cruel people describe themselves as paragons of frankness Tennessee Williams Truth and deception like good and evil have long been viewed as diametrically opposed and unreconcilable Yet few people can honestly claim they never lie In fact deception is practiced habitually in day to day life from the polite compliment that doesn't accurately relay one's true feelings to self deception about one's own motivations What fuels the need for people to intricately construct lies and illusions about their own lives If deceptions are unconscious does it mean that we are not responsible for their consequences Why does self deception or the need for illusion make us feel uncomfortable Taking into account the sheer ubiquity and ordinariness of deception this interdisciplinary work moves away from the cut and dried notion of duplicity as evil and illuminates the ways in which deception can also be understood as a adaptive response to the demands of living with others The book articulates the boundaries between unethical and adaptive deception demonstrating how some lies serve socially approved goals while others provoke distrust and condemnation Throughout the volume focuses on the range of emotions from feelings of shame fear or envy to those of concern and compassion that motivate our desire to deceive ourselves and others Providing an interdisciplinary exploration of the widespread phenomenon of lying and deception this volume promotes a more fully integrated understanding of how people function in their everyday lives Case illustrations humor and wit concrete examples and even a mock television sitcom script bring the ideas to life for clinical practitioners behavioral scientists and philosophers and for students in these realms **Lying and Deception in Everyday Life**

Lewis/Saarni, 1993-06-23 Taking into account the sheer ubiquity and ordinariness of deception this interdisciplinary work moves away from the cut and dried notion of duplicity as evil and illuminates the ways in which deception can also be understood as a adaptive response to the demands of living with others The book articulates the boundaries between unethical and adaptive deception demonstrating how some lies serve socially approved goals while others provoke distrust and condemnation Throughout the volume focuses on the range of emotions from feelings of shame fear or envy to those of concern and compassion that motivate our desire to deceive ourselves and others **The Rise of Consciousness and the Development of Emotional Life**

Michael Lewis, 2013-10-16 Synthesizing decades of influential research and theory Michael Lewis demonstrates the centrality of consciousness for emotional development At first infants competencies constitute innate reactions to particular physical events in the child's world These action patterns are not learned but are readily influenced by temperament and social interactions With the rise of consciousness these early competencies become reflected feelings giving rise to the self conscious emotions of empathy envy and embarrassment and later shame guilt and pride Focusing on typically developing children Lewis also explores problems of atypical emotional development Winner of William James Book Award Society for General Psychology APA Division 1 *Adman's Dilemma* Paul Rutherford, 2018-01-01 The Adman's

Dilemma is a cultural biography that explores the rise and fall of the advertising man as a figure who became effectively a licensed deceiver in the process of governing the lives of American consumers. Apparently this personage was caught up in a contradiction both compelled to deceive yet supposed to tell the truth. It was this moral condition and its consequences that made the adman so interesting to critics, novelists, and eventually filmmakers. The biography tracks his saga from its origins in the exaggerated doings of P. T. Barnum, the emergence of a new profession in the 1920s, the heyday of the adman's influence during the post WW2 era, the later rebranding of the adman as artist, until the apparent demise of the figure symbolized by the triumph of that consummate huckster, Donald Trump. In *The Adman's Dilemma*, author Paul Rutherford explores how people inside and outside the advertising industry have understood the conflict between artifice and authenticity. The book employs a range of fictional and nonfictional sources including memoirs, novels, movies, TV shows, websites, and museum exhibits to suggest how the adman embodied some of the strange realities of modernity.

**Encyclopedia of Deception**  
 Timothy R. Levine, 2014-02-20. The *Encyclopedia of Deception* examines lying from multiple perspectives drawn from the disciplines of social psychology, sociology, history, business, political science, cultural anthropology, moral philosophy, theology, law, family studies, evolutionary biology, philosophy, and more. From the little white lie to lying on a resume to the grandiose lies of presidents, this two-volume reference explores the phenomenon of lying in a multidisciplinary context to elucidate this common aspect of our daily lives. Not only a cultural phenomenon, historically, lying is a frequent occurrence in our everyday lives. Research shows that we are likely to lie or intentionally deceive others several times a day or in one out of every four conversations that lasts more than 10 minutes.

**Key Features:** More than 360 authored by key figures in the field are organized A to Z in two volumes which are available in both print and electronic formats. Each article concludes with cross-references to related entries and further readings.
