

The Lymphatic System & Body Defenses

ABOUT THE LYMPHATIC SYSTEM: An Introduction

THE LYMPHATIC SYSTEM

Consists of 2 sem-independent parts:

- Lymphatic vessels
- Lymphoid tissues & organs

Functions:

- Transport Fluids back to the blood
- Play essential roles in body defense and resistance to disease

LYMPHATIC VESSELS

interstitial fluid

- fluid that surrounds cells & tissues; formed as a result of blood filtration at the capillaries

Lympho-

- formed when interstitial fluid passes through lymphatic vessels

Lymphatic vessels (lymphatics)

- network of thin-walled, tubular structures forming an elaborate drainage system that picks up lymph & returns it to the blood
 - 1-way system toward the heart
 - No pump

Lymph capillaries

- Walls overlap to form flap-like minivalves & fluid leaks into them
- Higher pressure on the inside closes minivalves

Right lymphatic duct

- ↳ drains the lymph from the right arm & the right side of the head & thorax

Thoracic duct

- receives lymph from the rest of the body

LYMPH NODES

- Kidney-shaped, <1 inch long & cornered by a capsule of dense connective tissue
- Filter lymph before it is returned to the blood
- Defense cells
 - Macrophages
 - ➔ engulf and destroy foreign substances
 - Lymphocytes
 - ➔ provide immune response to antigens
- Layers
 - Cortex
 - ➔ outer part, contains follicles (collections of lymphocytes)
 - Medulla
 - ➔ inner part, contains phagocytes macrophages

Living By Design Larry R. Creveling, 2010-08-24 The human species has thrived because we were healthy and able to adapt to a variety of changes throughout our history Our health today is deteriorating under the influence of accelerating change to where we may not be prepared to continue to thrive unless we look to our past and identify lessons that may be fundamental for not only our continued survival as a species but to live healthier and more productive lives Living By Design identifies why we have been successful and what we must do to continue to be successful as individuals and as a species As a practical guide it offers conclusions not ordinarily found in other health books Many ideas presented are confrontational and meant to move the reader to question further and take action to change While the laws of our design for health are quite simple returning to principles of our design is challenging A return to living by design requires discipline but the rewards outweigh the suffering we may avoid by living otherwise
