NASA he contends has devolved from a pioneer of space exploration into a factionalized bureaucracy focused primarily on its own survival. And as a result humans haven't ventured beyond Earth orbit for three decades. Klerkx argues that after its wildly successful Apollo program NASA clung fiercely to the spotlight by creating a government sheltered monopoly with a few Big Aerospace companies. Although committed in theory to supporting commercial spaceflight in practice it smothered vital private sector innovation. In striking descriptions of space milestones spanning the golden 1960s Space Age and the 2003 Columbia tragedy Klerkx exposes the real NASA and envisions exciting public private cooperation that could send humans back to the moon and beyond Lost in Space Marleen S. Barr, 2017-11-01 Archaeologists and anthropologists discover other civilizations science fiction writers invent them. In this collection of her major essays Marleen Barr argues that feminist science fiction writers contribute to postmodern literary canons with radical alternatives to mainstream patriarchal society. Because feminist science fiction challenges male centered social imperatives it has been marginalized and dismissed from the canon thus lost in space. Moving beyond feminist science fiction itself Barr goes on to examine other literary genres from the perspective of feminist fabulation a term she has coined to encompass science fiction fantasy utopian literature and mainstream literature that critiques patriarchal fictions. Discussing the works of such writers as Margaret Atwood Joanna Russ Salman Rushdie Paul Theroux Ursula Le Guin Herman Melville Saul Bellow Edgar Allan Poe and Marge Piercy Barr illuminates feminist science fiction's connections to other literary traditions and contemporary canons. Her critical analysis yields a new and expanded understanding of feminist creativity *Lost in Space* Jon Schiller, 2009 The US Space Shuttle delivering supplies to the US Space Station has a

mechanical breakdown that prevents its return to the Earth The remaining two US Space Shuttles are launched as quickly as possible to carry the needed supplies to the Space Station before the people there run out of expendables air water etc Both aging Shuttles suffer breakdowns one explodes on the launch pad and the other has a breakdown in orbit near the Space Station This second Shuttle is close enough to the Space Station to be secured by a cable and then winched up to the Space Station docking gate The hero Dr Donald Richards devises two options for rescuing the stranded astronauts use the new European Space Station Shuttle or use the Soviet Space Shuttle The US President over rules NASA's recommendation to use the Soviet Space Shuttle for the rescue so Richards negotiates an agreement with the European Space Agency to use their Shuttle to rescue the astronauts
