Moral Disagreement Rach Cosker-Rowland, 2020-11-25 Widespread moral disagreement raises ethical epistemological political and metaethical questions Is the best explanation of our widespread moral disagreements that there are no objective moral facts and that moral relativism is correct Or should we think that just as there is widespread disagreement about whether we have free will but there is still an objective fact about whether we have it similarly moral disagreement has no bearing on whether morality is objective More practically is it arrogant to stick to our guns in the face of moral disagreement Must we suspend belief about the morality of controversial actions such as eating meat and having an abortion And does moral disagreement affect the laws that we should have For instance does disagreement about the justice of heavily redistributive taxation affect whether such taxation is legitimate In this thorough and clearly written introduction to moral disagreement and its philosophical and practical implications Rach Cosker Rowland examines and assesses the following topics and questions How does moral disagreement affect what we should do and believe in our day to day lives Epistemic peerhood and moral disagreements with our epistemic peers Metaethics and moral disagreement Relativism moral objectivity moral realism and non cognitivism Moral disagreement and normative ethics Liberalism democracy and disagreement Moral compromise Moral uncertainty Combining clear philosophical analysis with summaries of the latest research and suggestions for further reading Moral Disagreement is ideal for students of ethics metaethics political philosophy and philosophical topics that are closely related such as relativism and scepticism It will also be of interest to those in related disciplines such as ethics and public policy and philosophy of law **The Keystone** ,1909 *Doing Ethics in Media* Jay Black, Chris Roberts, 2011-04-19 *Doing Ethics in Media Theories and Practical Applications* is an accessible comprehensive introduction to media ethics Its theoretical framework and grounded discussions engage students to think clearly and systematically about dilemmas in the rapidly changing media environment The 13 chapter text is organized around six decision making questions the 5Ws and H of media ethics The questions encourage students to articulate the issues apply codes policies or laws consider the needs of stakeholders sift and sort through conflicting values integrate philosophic principles and pose a test of publicity Specifically the questions ask What s your problem Why not follow the rules Who wins who loses What s it worth Who s whispering in your ear How s your decision going to look As they progress through the text students are encouraged to resolve dozens of practical applications and increasingly complex case studies relating to journalism new media advertising public relations and entertainment Other distinctive features include Comprehensive materials on classic moral theory and current issues such as truth telling and deception values persuasion and propaganda privacy diversity and loyalty A user friendly approach that challenges students to think for themselves rather than imposing answers on them Consistent connections between theories and the decision making challenges posed in the practical applications and case studies A companion website with online resources for students including additional readings and chapter overviews as well as
