U.S. Carbine, Caliber .30, M1 Field Manual War Department, 2020-06-05 The United States Carbine Caliber 30 M1 is a lightweight semi automatic longarm that became a standard firearm for the U S military during World War II It was widely used by U S and foreign military police forces and has also been a popular civilian firearm The first M1 carbines were delivered in mid 1942 with priority given to troops in Europe The M1 was highly praised for its small size light weight and firepower especially by troops who were unable to use a full size rifle as their primary weapon The 30 Carbine cartridge was adequate in both muzzle energy and muzzle velocity The 30 Carbine had a round nose 110 gr bullet in contrast to the spitzer bullet designs found in most full power rifle cartridges of the WWII era A total of over 6.5 million M1 carbines and variants were manufactured making it the most popular small arm for the American military during World War II Created in 1942 this field manual

reveals a great deal about the M1's design and capabilities. Intended as a manual for those charged with operation, it details many strategies for attaining outstanding marksmanship. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text. **TM 9-1005-223-10**
