

HANDLEBAR

REMOVING AND INSTALLING HANDLEBAR

Referring to Figure 2.18, handlebar (13) is attached to upper fork bracket of motorcycle by hardware (2). The particular arrangement of hardware varies with fork used.

There are two attaching hardware arrangements. One uses handlebar clamps along with hex head screws, nuts, and washers utilizing through holes in upper fork bracket. Ceriani forks use this arrangement. The other arrangement uses handlebar clamps along with allen head screws attached to holes threaded into upper fork bracket, requiring no nuts. Marzocchi and Betor forks use this arrangement.

In either case, removing screws will detach handlebar from fork bracket.

Next remove throttle control and both lever-switch housings. Loosening screws (1), Figure 2.19, will allow throttle control to be slipped off handlebar. Removal of screws (18), Figure 2.18, will allow lever housings to be separated from switch housings and thereby removed from handlebar.

The handlebar will then be freed completely from motorcycle. Assemble it back on motorcycle in reverse order of disassembly.

REMOVING AND REPLACING THROTTLE CABLE ASSEMBLY

The throttle cable controls both carburetor and oil pump through an equalizer. To replace cable, therefore, cable must be detached from both these devices plus at throttle control on handlebar.

Figure 2.18. Handlebar and Associated Components
