Harnessing The Eastern Himalayan Rivers Regional Cooperation In South Asia:

Harnessing the Eastern Himalayan Rivers B. G. Verghese, Ramaswamy R. Iyer, 1993 **Conflict and Cooperation on South Asia's International Rivers** Salman M. A. Salman, Kishor Uprety, 2002 Conflict and Cooperation on South Asia's International Rivers traces the development of international water law This book focuses on the hydro politics of four countries in the South Asia region Bangladesh India Nepal and Pakistan It analyzes the problems that these countries have encountered as riparians of international rivers and how they have addressed these problems In particular this study reviews the treaty regimes governing the Indus River basin the Ganges River basin and the Kosi Gandaki and Mahakali river basins Each of these regimes is described in depth with special attention devoted to the main problems each of these treaties sought to address The authors also review the treaty experience and offer observations on bilateralism and multilateralism

Shared Watercourses and Water Security in South Asia Salman M.A. Salman, Kishor Uprety, 2018-08-13 Shared water resources in South Asia face various challenges including scarcity population growth and climate change impacts on all the riparians Consequently national calls for water security have become louder As a result collaboration among the nations of South Asia for ensuring equitable sharing of such water resources has not been optimal While most countries do not have reliable systems for data generation those possessing some hydrological data consider them state secrets restricting their exchange Even when treaty obligations exist data sharing practices are ad hoc and the range of information shared is limited Thus negotiating new transboundary water treaties amongst South Asia's riparian countries has become a daunting task and enforcing existing ones remains a real challenge **International Relations Theory and South Asia (OIP)** E. Sridharan, 2014-11-13 Drawing upon international relations theory this volume conceptualizes possible solutions to the various conflicts in South Asia It analyses the bilateral conflicts between India and Pakistan and other multilateral problems specific to this region Bringing together scholarship from several South Asian countries it offers a well rounded formulation of conflict resolution and cooperation building The volume employs a strong theoretical rubric empirical research and exhaustive fieldwork Its centralizing approach to sustain the diversity of perspectives and arguments makes it an indispensable contribution to strategic studies

Climate Change and Water Resources in South Asia M. Monirul Qader Mirza, Q.K Ahmad, 2005-06-30 This book addresses the most pressing water resource issues in South Asia particularly in relation to climate change and variability This is a region characterised by abundant water during the monsoon when devastating floods occur and by scarcity of water and droughts during the dry period These extreme events often cause substantial damage to **India Bangladesh Domestic Politics** Punam Pandey, 2016-11-26 This book deals with how the governments of India and Bangladesh manage the Ganges River On the basis of the Ganges issue it explains India's involvement in the domestic politics of Bangladesh and how this involvement in turn shapes Ganges river politics The book further analyses the constant friction between Indian preferences for bilateral negotiation in comparison to Bangladesh's

demand for multilateral cooperation on the Ganges This also highlights the role of civil society tracing how organisations have engaged in and explored potential compromises acceptable to both countries As the term of the treaty comes to an end in 2026 the present work underlines its limitations as the impacts of climate change will involve far more than distress on water In closing it discusses a range of other challenges including the erosion of the Indian central government s monopoly in foreign policy especially in relation to its neighbours Through extensive fieldwork in India and Bangladesh together with interviews with politicians diplomats and all those closely associated with the Ganges deliberations the book reveals subtle aspects of the negotiations What emerges as a distinctive feature of Indo Bangladesh interactions on the Ganges is the fact that successful outcomes depend on the extent to which the ruling political powers in both countries accommodate one other s domestic political dynamics This insight enriches scholarship on the Ganges River addressing an aspect largely overlooked in the literature Offering an up to the minute analysis the book examines the implementation of the Ganges Treaty through 2015 making it of interest to researchers focusing on South Asia and international relations scholars on and practitioners of Indian foreign policy journalists water experts civil society groups and university students **India** Stephen P. Cohen, 2001 This landmark book provides the first comprehensive assessment of India as a political and strategic power since Indias nuclear tests its 1999 war with Pakistan and its breakthrough economic achievements **World Scientific Handbook Of Transboundary Water Management: Science, Economics, Policy And Politics (In 4 Volumes)** , 2025-01-10 The impacts of population growth climate change and water scarcity and variability on a country s economy or society in addition to the sheer need to harness international rivers for domestic and regional purposes have made the management of transboundary freshwater a subject of great import Over the past several decades research in various disciplines utilizing a variety of methodologies has explored these issues focusing on freshwater s strategic importance as well as conflict cooperation and negotiation over shared water bodies rivers lakes aquifers This multi volume set seeks to contribute to this still burgeoning body of literature by focusing on several key themes that can help explain and recognize successes and failures in transboundary freshwater management In particular the set seeks to bring together original scholarship focusing on international law technology institutions formal and informal and the interplay of domestic and international affairs Each edited volume in the set aims to build on extant research while also fostering new paths of inquiry Overall the set seeks to become a guide for both academics and practitioners hoping to better understand the joint management of this precious natural resource from socio political legal economic and technological perspectives Volume 1 explores international law for shared freshwater resources both surface and subsurface waters from a multidisciplinary perspective It explains the role of international water law IWL and or specific norms within particular contexts case studies and critically examines that role and its relative success or failure in achieving the intended objectives Volume 2 explores the roles of and limitations of technologies and their applications in the management of transboundary water and wastewater It presents case studies and

legal and political analyses that focus on the potential or actual roles and implications of the technologies in transboundary policy and management rather than detailed explications of the technologies themselves Volume 3 contributes to the growing literature seeking to understand how when and if institutions broadly defined impact states abilities to address their joint water disputes The volume presents a combination of single comparative and empirical analyses of cases across the world about the role of institutions in facilitating collaboration over transboundary water resources and mitigating conflict Volume 4 seeks to make sense of the interplay of domestic transnational and international dynamics in explaining conflict and cooperation over water through single or comparative case studies as well as analyses of on the ground transboundary water management experiences arising from these complex political dimensions Collaboration in Water Resource Management in Vietnam and South-East Asia Pham Quang Minh, Detlef Briesen, 2020-06-04

Wasser Wasserressourcen und Wasserwirtschaft sind heute mit die schwierigsten nicht traditionellen und grenz überschreitenden Sicherheitsprobleme überhaupt Auf der Grundlage von Dokumenten aus erster Hand versuchen die Experten in diesem Band ein Verständnis dafür zu entwickeln warum die Greater Mekong Subregion GMS aus geostrategischer Sicht wichtig ist welche historischen und aktuellen Herausforderungen die Region zu bewältigen hat wie sich Großmächte wie China Indien Japan und die USA politisch in der GMS engagieren und was die GMS in der Frage des Wasserressourcenmanagements von anderen Regionen lernen kann Managing Water Conflict Ashok Swain, 2004-06-01 Countries are meeting increasing water demand by building reservoirs and by diverting water from one area to another When the water belongs to an international river system these measures lead to riparian conflicts However water scarcity not only brings conflict to these regions but also plays its part in building cooperation In several international river basins in Asia Africa and the Middle East competing and disputing riparian countries are now moving towards a cooperative sharing arrangement The signs of agreements on water sharing may be easy but the real problem is how to keep these arrangements on track Such agreements can positively contribute to peace and cooperation by addressing future needs making sustainable decisions and being progressive in their management Managing Water Conflict looks at these current stresses and likely future scenarios for this vitally important subject

South Asia Trade and Energy Security Narottam P. Banskota, 2012 Today policy makers in both developed and developing countries are pursuing regionalization as a means to achieve easier market access economies of scale and welfare gains South Asia Trade and Energy Security explains how regional economic cooperation in trade and energy security could help facilitate the economic transformation of the region reducing poverty and expanding production Currently intra regional trade in South Asia is constrained by tariff and non tariff barriers A fully functional free trade area as envisaged in the South Asian Free Trade Area agreement has yet to be realized This book explains the current patterns and limitations of energy trade between countries in South Asia and how the growing demand for energy could be met by working closely with energy rich Iran Burma and Central Asian countries Cross border cooperation between India and China Chinese investment in Tibet

and Xinxiang and water relations are also discussed Policymakers geopolitical strategists and academics working in Asian Studies will appreciate this detailed analysis of how globalization and regional cooperation in trade and energy are playing a transformative role in South Asia s economic development

The Nepal-India Water Relationship: Challenges Dwarka N. Dhungel, Santa B. Pun, 2009-01-18 Since its establishment as a policy research institute in 1990 the Institute for In graded Development Studies IIDS has been engaged in promoting public awa ness and understanding of issues of national importance by undertaking studies and research on contemporary themes It has been disseminating findings of its studies to policymakers in the public and private sectors and ultimately to the public at large Water resources is one of the areas of strong public interest in Nepal It is cons ered a potent engine of economic growth Its optimal use is dependent on among other things the cooperation among the riparian countries especially India and Bangladesh Water resources development is one of the subjects in which the Ins tute has been engaged since its beginning by undertaking studies through national professionals and joint studies on the water resources of the Ganges Brahmaputra and Meghna river basins with policy research institutes from India and Bangladesh In order to help policymakers to develop long term perspectives of the need for cooperation for optimal use of water available in the tributaries of the Ganges the Institute was involved in a major track two exercise for over five years during the 1990s The Institute has been undertaking a series of exercises in the form of p lication and dissemination of study findings in the field since the early 1990 s In that series this book is the latest one and is published in collaboration with Springer Science Business Media BV Dordrecht The Netherlands

The Ganges Water Diversion: Environmental Effects and Implications M. Monirul Qader Mirza, 2006-02-03 This book deals with environmental effects on both sides of the border between Bangladesh and India caused by the Ganges water diversion This issue came to my attention in early 1976 when news media in Bangladesh and overseas began publications of articles on the unilateral withdrawal of a huge quantity of water from the Ganges River through the commissioning of the Farakka Barrage in India I first pursued the subject professionally in 1984 while working as a contributor for Bangladesh Today Holiday and New Nation During the next two decades I followed the protracted hydro political negotiations between the riparian countries in the Ganges basin and I traveled extensively to observe the environmental and ecological changes in Bangladesh as well as India that occurred due to the water diversion The Ganges one of the longest rivers of the world originates at the Gangotri glacier in the Himalayas and flows across the plains of North India Eventually the river splits into two main branches and empties into the Bay of Bengal The conflict of diversion and sharing of the Ganges water arose in the middle of the last century when the government of India decided to implement a barrage at Farakka to resolve a navigation problem at the Kolkata Port

Bridges Over Water: Understanding Transboundary Water Conflict, Negotiation And Cooperation Ariel Dinar, Shlomi Dinar, Daene C Mckinney, Stephen C Mccaffrey, 2007-10-22 Latest Edition Bridges Over Water Understanding Transboundary Water Conflict Negotiation and Cooperation 2nd Edition Bridges over Water places the study of

transboundary water conflicts negotiation and cooperation in the context of various disciplines such as international relations international law international negotiations and economics analyzing them using various quantitative approaches such as river basin modeling and game theory Case studies of particular transboundary river basins lakes and aquifers are also considered This is the first textbook for a relatively recent yet rapidly expanding field of study Errata s Errata *The Oxford Handbook of Environmental and Natural Resources Law in India* Philippe Cullet, Lovleen Bhullar, Sujith Koonan, 2024-07-12

Environmental law is a broad discipline covering issues such as nature conservation the prevention or abatement of pollution and waste management It also encompasses concerns related to natural resources such as forests minerals and fisheries and the balance between their use and conservation India has been at the forefront of jurisprudential developments among countries with similar environmental geographical socio economic and cultural conditions Concurrently the country has been receptive to ideas and principles arising from other parts of the world or from international law The growth of environmental and natural resources law in India has been sustained in equal measure by growing environmental awareness and the increasingly dire nature of the problems associated with the environment and natural resources ranging from local issues to the global climate crisis At the same time the continuous push for development has not abated leading to recurrent pressure to weaken existing standards for environmental protection and the management and use of natural resources The Oxford Handbook of Environmental and Natural Resources Law in India offers the most comprehensive coverage of the diverse and complex discipline of environmental and natural resources law in India over the past fifty years With forty two contributions from law and non law scholars the Handbook presents diverse perspectives on several areas including biodiversity climate change water forests agriculture health resource extraction and industrial development By departing from the existing approach that examines natural resources law and environmental law separately The Oxford Handbook of Environmental and Natural Resources Law in India offers a much needed integrated analysis of the development of domestic jurisprudence vis vis the environment and natural resources International Watercourses Law for the 21st Century Surya P. Subedi, 2016-12-05

This edited volume presents a comprehensive and comparative view of the law of international watercourses with special reference to the issues facing the Ganges River basin It provides an analysis of the development of international waterways law and outlines the essentials of the UN Convention on non navigational uses of international watercourses Focusing on relations between the three riparian states of the River Ganges and the potential for cooperation the volume also examines the domestic legal regimes of the area and the political dimension to the issues of sharing the waters of the river The work presents a comparative picture with an analysis of developments in the Rhine and Mekong basins comparing developments in the legal regimes of these areas with the experience of South Asia Presenting an up to date analysis of the current law and pointing the direction for future developments this collection will be a valuable resource for academics researchers and policy makers working in this area *The Law of Non-navigational Uses of International*

Watercourses Nahid Islam, 2010-01-01 Presentation de l'auteur Despite Asia's large share of global water resources and the importance of its water for sustaining one of the largest agrarian populations in the world Asia's trans boundary water resource management regimes are poorly developed There are only two working international regimes in South and South east Asia the Mekong and the Indus regimes The remaining international watercourses in Asia are used by riparian countries in a self interested manner without much consideration for the interests of other states or for the environment These national interests do not often represent the interests and needs of the local people This book is divided into three Parts Part I discusses the different contexts of law making in the industrialized west and in agrarian societies in Asia as well as the changing context of law making following the emergence of the concept of sustainable development Part II discusses the regime of international watercourses Part III of the book presents two case studies in Asia the Mekong and the Ganges The main argument is that in the absence of public participation in decision making and resource management the basin states revert to using the watercourses according to the principles of the classical regime The result so far has been unsustainable development environmental degradation and growing poverty of local user communities

Flood Problem and Management in South Asia M. Monirul Qader Mirza, Ajaya Dixit, Ainun Nishat, 2013-03-09 Flood Problem and Management in South Asia focuses on both the hazard and the vulnerability aspects of floods This book addresses floods in South Asia from a multidisciplinary approach The characteristics and nature of the flood problem and its management aspects are examined It is suggested that flood control and management focused on structural solutions using embankments and reservoirs are insufficient Effective solutions must go beyond structural measures and require major restructuring of both legal systems and institutions responsible for management For those people living in the vast flood plains of South Asia to be able to overcome social economic and environmental vulnerabilities an adaptive approach to management of flood risks that identifies specific strategies is needed

Cooperation on the Eastern Himalayan Rivers Karna Dhoj Adhikary, 2000 This Book Presents The Nine Studies Conducted Jointly By Bangladesh Unnayan Parishad Bup Dhaka Centre For Policy Research New Delhi And Institute For Integrated Development Studies Iids Kathmandu As A Part Of Phase II Of The Initiative Launched By The Three Institutions In 1990 Focusing On Regional Cooperation In The Harnessing Of The Eastern Himalayan Rivers

Water Conflicts in India K.J. Joy, Suhas Paranjape, Biksham Gujja, Vinod Goud, Shruti Vispute, 2020-11-29 Water conflicts in India have now percolated to every level They are aggravated by the relative paucity of frameworks policies and mechanisms to govern the use of water resources Based on the premise that understanding and documenting different types of water conflict cases in all their complexity would contribute to informed public debate and facilitate their resolution Forum for Policy Dialogue on Water Conflicts in India a collaborative initiative of the WWF project Dialogue on Water Food and Environment documented a number of such case studies One of its kind in India this book brings together an impressive sixty three case studies summarized status of the conflicts the issues involved and their current position and gives us a glimpse

into the million revolts that are brewing around water. While recognizing that each conflict is a microcosm of wider conflicts, the editors have classified these cases into eight broad themes that try to capture the dominant aspect of the conflict. These are: contending water uses; dams and displacement; equity access; allocations; micro level conflicts; water quality; trans boundary conflicts; privatization; and excavation and mining. With a mix of academics and activists as contributors, the book makes an important contribution to a new discourse on water in general and water conflicts and conflict resolution in particular.
