Custers,Steven J. Durning,2017-11-06 This book is open access under a CC BY 4 0 license This volume describes and explains the educational method of Case Based Clinical Reasoning CBCR used successfully in medical schools

to prepare students to think like doctors before they enter the clinical arena and become engaged in patient care Although this approach poses the paradoxical problem of a lack of clinical experience that is so essential for building proficiency in clinical reasoning CBCR is built on the premise that solving clinical problems involves the ability to reason about disease processes This requires knowledge of anatomy and the working and pathology of organ systems as well as the ability to regard patient problems as patterns and compare them with instances of illness scripts of patients the clinician has seen in the past and stored in memory CBCR stimulates the development of early rudimentary illness scripts through elaboration and systematic discussion of the courses of action from the initial presentation of the patient to the final steps of clinical management The book combines general backgrounds of clinical reasoning education and assessment with a detailed elaboration of the CBCR method for application in any medical curriculum either as a mandatory or as an elective course It consists of three parts a general introduction to clinical reasoning education application of the CBCR method and cases that can be used by educators to try out this method

Palliative Care Nursing Marianne Matzo, Marianne L. Matzo, Deborah Witt Sherman, 2018-06-28 This 5th edition is an important achievement it is a symbol of commitment to the field of palliative nursing where we have been and where we are going Betty Rolling Ferrell PhD MA FAAN FPCN CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago Based on the need to humanize rather than medicalize the illness experience for patients this text delves into palliative care beyond the specific diseases affecting the patient Instead content focuses on the whole person and family Palliative patients struggle with chronic debilitating and painful conditions and grapple with the fact that life as they knew it has already passed away Families and friends reciprocally suffer not knowing how to help and therefore become the secondary victims of the disease This is not the challenge of a lone nurse or a single physician therapist or social worker Rather palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience continue to find meaning and purpose in life and cure what can be cured Palliative Care Nursing Fifth Edition delivers advanced empirical aesthetic ethical and personal knowledge This new edition brings an increased focus on outcomes benchmarking progress and goals of care It expounds upon the importance of the cross disciplinary collaboration introduced in the previous edition Every chapter in Sections I II and III includes content written by a non nursing member of the interprofessional team Based on best evidence and clinical practice guidelines this text presents comprehensive targeted interventions responsive to the needs of palliative and hospice patients and family Each chapter contains compassionate timely appropriate and cost effective care for diverse populations across the illness trajectory Key Features The expanded new edition offers current comprehensive one stop source of highly relevant clinical information on palliative care Life span approach age appropriate

nursing considerations e g geriatric pediatric and family Includes disease specific and symptom specific nursing management chapters Promotes a holistic and interdisciplinary approach to palliative care Offers important legal ethical and cultural considerations related to death and dying Case Studies with Case Study Conclusion in each clinical chapter New to The Fifth Edition An expanded chapter on Palliative Care incorporates most up to date scope and standards information on Basic and Advanced HPNA certification self reflection and self care for nurses A chapter on Interprofessional Collaboration Instructor Resources Power points and Test bank

Human Health and Ecological Integrity Laura Westra,Colin Lionel Soskolne,Donald W. Spady,2012 The connection between environment and health has been well studied and documented particularly by the World Health Organization It is now being included in some legal instruments although for the most part caselaw does not explicitly make that connection Neither the right to life nor the rights to health or to normal development are actually cited in the resolution of cases and in judges decisions This volume makes the connection explicit in a broad review of human rights and legal issues associated with public health and the environment It will be particularly useful as many legal instruments emphasize the right to development without fully discussing the necessary safety and public health aspects and the respect for the ecology of any area where such development often unwanted by local or indigenous communities is to be located Climate change is another pressing variable that is considered and several chapters address the interface between human health and ecological conditions Overall the book integrates perspectives from a wide range of disciplines including ethics ecology public health and epidemiology and human rights and law
