Split Possession Thomas Stolz, Sonja Kettler, Cornelia Stroh, Aina Urdze, 2008-05-21 This book is a functional typological study of possession splits in European languages It shows that genetically and structurally diverse languages such as Icelandic Welsh and Maltese display possessive systems which are sensitive to semantically based distinctions reminiscent of the alienability correlation These distinctions are grammatically relevant in many European languages because they require dedicated constructions What makes these split possessive systems interesting for the linguist is the interaction of semantic criteria with pragmatics and syntax Neutralisation of distinctions occurs under focus The same happens if one of the constituents of a possessive construction is syntactically heavy These effects can be observed in the majority of the 50 sample languages Possessive splits are strong in those languages which are outside the Standard Average European group The bulk of the European languages do not behave much differently from those non European languages for which possession splits are reported The book reveals interesting new facts about European languages and possession to typologists universals researchers and areal linguists

Ideological Manipulation of Children's Literature Through Translation and Rewriting Vanessa Leonardi, 2020-07-06 This book explores the topic of ideological manipulation in the translation of children's literature by addressing several crucial questions including how target language norms and conventions affect the quality of a translation how translations are selected on the basis of what is culturally accepted who is involved in the selection of what should be translated for children in the target culture and how this process takes place The author presents different ways of looking at the translation of children's books focusing particularly on the practices of intralingual and interlingual translations as a form of rewriting across a selection of European languages This book will be of interest to Translation Studies and children's literature scholars as well as those with a wider interest in the impact of ideology on culture
