Wilson,2023-04 In 1975 workers at Life Science Products a small makeshift pesticide factory in Hopewell Virginia became ill after exposure to

Kepone the brand name for the pesticide chlordecone They made the poison under contract for a much larger Hopewell company Allied Chemical Life Science workers had been breathing in the dust for more than a year Ingestion of the chemical made their bodies seize and shake News of ill workers eventually led to the discovery of widespread environmental contamination of the nearby James River and the landscape of the small working class city Not only had Life Science dumped the chemical but so had Allied when the company manufactured it in the 1960s and early 1970s The resulting toxic impact was not only on the city of Hopewell but also on the faraway fields where Kepone was used as an insecticide Aspects of this environmental tragedy are all too common corporate avarice ignorance and regulatory failure combined with race and geography to determine toxicity and shape the response But the Kepone story also contains some surprising medical legal and political moments amid the disaster With Poison Powder Gregory S Wilson explores the conditions that put the Kepone factory and the workers there in the first place and the effects of the poison on the people and natural world long after 1975 Although the manufacture and use of Kepone is now banned by the Environmental Protection Agency organochlorines have long half lives and these toxic compounds and their residues still remain in the environment

Chesapeake Oysters Katherine J. Livie, 2021-04-13 This cultural and ecological history explores the rise of Chesapeake s mighty mollusk from Colonial era harvesting to contemporary cultivation Oysters are an essential part of Chesapeake Bay culture and cuisine as well as the ecological and historical lifeblood of the region When colonists first sailed these abundant shores they described massive shoals of foot long oysters In later years however the bottomless appetite of the Gilded Age and great fleets of skipjacks took their toll Disease environmental pressures and overconsumption decimated the population by the end of the twentieth century To combat the problem Virginia began leasing its waters to private oyster farmers Today these boutique oyster farms are sustainably meeting the culinary demand of a new generation of connoisseurs But in

Maryland passionate debate continues among scientists and oystermen whether aquaculture or wild harvesting is the better path With careful research and interviews with experts author Kate Livie presents this dynamic story and a glimpse of what the future may hold
