The Texas Railroad Commission William R. Childs, 2005 Before OPEC took center stage one state agency in Texas was widely believed to set oil prices for the world The Texas Railroad Commission TRC evolved from its founding in 1891 to a multi divisional regulatory commission that oversaw not only railroads but also a number of other industries central to the modern American economy petroleum production natural gas utilities and motor carriers buses and trucks William R Childs s unprecedented study of the TRC from its founding until the mid twentieth century extends our knowledge of commission style regulation It focuses on the interplay between business and regulators between state and national regulatory commissions and among the three branches of government through a process of pragmatic federalism Drawing on extensive primary research Childs demonstrates that the alleged power of regulatory commissions has been more constrained than most observers have recognized As he shows the myth of power was devised by the agency itself as part of building a civil religion of Texas oil Together the myth and the civil religion enabled the TRC to convince Texas oil operators to follow production controls and thus stabilized the American oil industry by the 1940s The result of this
