Keßler,2009-03-26 A fundamental issue in second language acquisition research and in applied linguistics is the question of how learners acquire a second language Today it is general knowledge that any second language learning follows certain theoretically established and empirically supported developmental sequences Based on Processability Theory Pienemann 1998 and 2005 one can diagnose current states of individual learners second language development Knowing about the path of second language development provides important insights into what learners are ready to acquire in the second language at a given point in time This can support second language learning

both in natural and instructional settings Pienemann s Processability Theory PT provides a well researched and empirically substantiated framework to explain the developmental sequences in second language learning across languages Taking Pienemann 1998 and 2005 as the point of departure the chapters of this book apply test and extend PT The book is organised in four parts I Introduction II Current Theoretical Issues within the PT Framework III Applying PT to the Second Language Classroom and IV Work in Progress within the PT Framework Appraising Research in Second Language Learning Graeme Keith Porte,2002-01-01 Aimed at students of applied linguistics and TEFL on research training courses and practising language teachers this work provides specific advice and support to those wishing to learn how to approach the critical anaysis of a research paper Understanding Language Choices Ken Decker,John Grummitt,2017-05-26 Understanding Language Choices is an introductory textbook for anyone studying the motivations behind language use choices It provides an introduction into the numerous factors both internal and external influencing such choices in a speech community language attitudes language learning identity the mobility of the community and much more The book also provides a foundation for the study of linguistic variation within a speech community as well as an introduction to methods of data collection when studying the outcomes of language use choices An important aspect of this book is its emphasis on a participatory approach to language choice research that empowers the speech community The final chapter discusses lifestyle concerns that researchers may encounter when conducting field studies in developing nations Written with the beginner in mind this textbook includes numerous examples and case studies from around the world to illustrate the realities of sociolinguistic field research A companion website keeps users of the book up to date with descriptions of the most current research methodologies Ken Decker received his M A in Linguistics from the University of Texas at Arlington in 1992 He brings to this book over 25 years experience in field research in the sociology of language and language development He has conducted sociolinguistic surveys in more than 35 languages in Asia and the Americas and served as consultant on surveys in Africa Australia Europe and the Pacific Ken is particularly interested in the role of language research in strategic language development John Grummitt received his M A in Applied Linguistics from the University of Leicester in 2002 drawing on his decade s experience as an academic writing tutor and trainer of teachers in ESL programs in Japan and South Korea His more recent survey work in Papua New Guinea has given him a perspective supplementary to Decker s on sociolinguistic fieldwork and language development
