Approaching the Ancient Artifact Amalia Avramidou, Denise Demetriou, 2014-08-25 This volume consists of forty contributions written by an internationally renowned selection of scholars The authors adopt an interdisciplinary methodology examining both literary and archaeological sources and a comparative perspective that transgresses national chronological and cultural boundaries in order to investigate the nature of the links between text and image This multifaceted approach to the study of ancient artifacts enables the authors to treat art and artistic production as activities that do not merely mirror social or cultural relationships but rather and more significantly as activities that create social and cultural relationships The essays in this book are motivated by their authors belief that there is no simple direct link between art and myths art and text or art and ritual and that art should not be delegated to the role of a by product of a literate culture Instead the contextual and symbolic analyses of artifacts and representations offered in this volume elucidate how art actively shaped myth how it changed texts how it transformed ritual and how it altered the course of local regional and Mediterranean histories

Cosa and the Colonial Landscape of Republican Italy (Third and Second Centuries BCE) Andrea De Giorgi, 2019-11-20 This important new volume examines archaeological evidence of Roman

colonization of the Middle Republican period Themes of land use ethnic accommodation and displacement colonial identity and administrative schemes are also highlighted In delving deeply into the uniqueness of select colonial contexts these essays invite a novel discussion on the phenomenon of colonialism in the political landscape of Rome s early expansion Roman urbanism of the Middle Republican period brought to the Italian peninsula fundamental changes an important example of which highlighted by a wealth of studies is the ebullience of a dense network of colonies as well as a mix of senatorial tactics and individual initiatives that underpinned their foundation Whether Latin Roman or Maritimae colonies created a new mesh of communities and imposed a new topography more subtly they signified the mechanisms of the rising hegemony This book brings to the fore the diversity agendas and overall impact of a settlement device that changed the Italian landscape and introduced a new idea of Roman town

Times of Transition Sylvie Honigman,Christophe Nihan,Oded Lipschits,2021-03-15 This multidisciplinary study takes a fresh look at Judean history and biblical literature in the late fourth and third centuries BCE In a major reappraisal of this era the contributions to this volume depict it as one in which critical changes took place Until recently the period from Alexander s conquest in 332 BCE to the early years of Seleucid domination following Antiochus III s conquest in 198 BCE was reputed to be poorly documented in material evidence and textual production buttressing the view that the era from late Persian to Hasmonean times was one of seamless continuity Biblical scholars believed that no literary activity belonged to the Hellenistic age and archaeologists were unable to refine their understanding because of a lack of secure chronological markers However recent studies are revealing this period as one of major social changes and intense literary activity Historians have shed new light on the nature of the Hellenistic empires and the relationship between the central power and local entities in ancient imperial settings and the redating of several biblical texts to the third century BCE challenges the traditional periodization of Judean history Bringing together Hellenistic history the archaeology of Judea and biblical studies this volume appraises the early Hellenistic period anew as a time of great transition and change and situates Judea within its broader regional and transregional imperial contexts

Collapse or Survival Elisa Perego, Rafael Scopacasa, Silvia Amicone, 2019-12-31 In the present day world order political disintegration the faltering of economic systems the controversial yet dramatic consequences of global warming and pollution and the spread of poverty and social disruption in Western countries have rendered collapse one of the hottest topics in the humanities and social sciences In the frenetic run for identifying the global causes and large scale consequences of collapse however instances of crisis taking place at the micro scale are not always explored by scholars addressing these issues in present and past societies while the voices of the marginal non lite subjects that might be

the main victims of collapse are often silenced in ancient history and archaeology Within this framework Collapse or Survival explores localized phenomena of crisis unrest and survival in the ancient Mediterranean with a focus on the first millennium BC In a time span characterized by unprecedented high levels of dynamism mobility and social change throughout that region the area selected for analysis represents a unique convergence point where states rise and fall long distance trade networks develop and disintegrate and patterns of human mobility catalyze cultural change at different rates The central Mediterranean also comprises a wealth of recently excavated and highly contextualized material evidence casting new light on the agency of individuals and groups who endeavored to cope with crisis situations in different geographical and temporal settings Contributors provide novel definitions of collapse and reconsider notions of crisis and social change by taking a broader perspective that is not necessarily centred on elites Individual chapters analyze how both high status and non elite social agents responded to socio political rupture unrest depopulation economic crisis the disintegration of kinship systems interruption in long term trade networks and destruction in war
