Green The Circle Series:

The Circle Series 4-in-1 Ted Dekker, 2011-05-09 Ted Dekker's bestselling and most beloved series together in one volume. It's an epic tale of evil and rescue, betrayal and love and a terrorist threat unlike anything the human race has ever known. Thomas Hunter is an unlikely hero who finds himself pulled between two worlds. In our reality, he works in a coffeehouse. In the other, he becomes a battle-scarred general leading a band of warriors known as the Circle. Every time he falls asleep in one reality, he wakes in the other, and both worlds are facing catastrophic disaster. In one world, Thomas must race to outwit sadistic terrorists intent on creating a global pandemic by releasing an unstoppable virus. In the other, far into the future, a forbidden love could forever destroy the Circle's ragtag resistance. Thomas can bridge both worlds, but he quickly realizes that he may not be able to save either. In this mind-bending adventure, the fate of both worlds now rests on his ability to shift realities through his dreams and somehow find a way to change history. Four novels. Two worlds. One story. Praise for the Circle series: As a producer of movies filled with incredible worlds and heroic characters, I have high standards for the fiction I read. Ted Dekker's novels deliver big with mind-blowing plot-twisting page-turners. Fair warning: this trilogy will draw you in at a breakneck pace and never let up. Cancel all plans before you start because you won't be able to stop once you enter. *Black Ralph Winter Producer X Men X2 X Men United Star Trek V Final Frontier* Bestselling epic fantasy series. One volume that contains all four novels in The Circle series: *Black Red White and Green*. Includes an alternate ending to *Green*. Bonus interview with the author. *Complete Circle Series: Hardcover Box Set* Ted Dekker, 2009-08-31 More than a million readers have experienced the Circle series. Now for the first time ever and only for a limited time, they can dive deeper with a limited edition boxed set. Included in this special collector's set is Dekker's highly anticipated new novel *Green*. New hardcover editions of *Black Red* and *White*, originally published in 2004 but long gone from shelves. Specially commissioned collector's box to display this limited edition set. Perfect for Christmas gift giving. This is a must-have for the thousands of hardcore fans as well as for the newer Dekker fans who now have a limited window to secure hardcover editions of the entire epic series. **Red** Ted Dekker, 2009-07 We have stepped off the cliff and are falling into madness. The mind-bending pace of *Black* accelerates in *Red*. Book Two of Ted Dekker's groundbreaking Circle trilogy. Less than a month ago, Thomas Hunter was a failed writer selling coffee at the Java Hut in Denver. Now he finds himself in a desperate quest to rescue two worlds from collapse. In one world, he's a battle-scarred general commanding an army of primitive warriors. In the other, he's racing to outwit sadistic terrorists intent on creating global chaos through an unstoppable virus. Two worlds on the brink of destruction. One unthinkable solution. Enter an adrenaline-laced epic where dreams and reality collide. Nothing is as it seems as *Black* turns to *Red*. **Orr's Circle of the Sciences. relationships in time and space and expressing them with precise and clear formulas In this regard one cannot rely on the rote memorization of rules and formulas insight and intuitive understanding are crucial But how can this understanding be achieved in higher mathematics which depends on abstract concepts such as complex numbers real and complex infinite series infinitesimal calculus 2 3 and 4 dimensional functions conformal maps vectors and linear and nonlinear ordinary and partial differential equations The author takes a highly practical approach to facilitating the insight essential for true learning in mathematics Students can work directly with the simulation programs can visualize relationships and creatively interact with the calculation procedures Proceeding in textbook fashion the work makes use of a broad palette of multimedia tools and features numerous interactive calculation programs for mathematical experimentation Students merely have to select one of the many predefined examples and set the relevant parameters and in a flash the results are graphically displayed in 2 or 3 dimensions In addition the specific functions used can be changed or even newly formulated according to user preferences For example a procedure developed for a fourth degree power function for the numerical calculation of zero points can be adapted for use with another function Each simulation is accompanied by a detailed description instructions for use and numerous suggestions for experimentation The mathematical simulations are based on the Easy Java Simulation EJS programming tool All of the files developed with EJS are completely open and transparent The user can even draw on the examples as building blocks for the development his or her own calculation procedures The appendix contains a short introduction to EJS The work is enriched by a comprehensive collection of cosmological simulations as well as models from the Open Source Physics project organized by subject area Intended as a systematic collection of methods and materials for upper secondary school teachers and as a course for students of physics and mathematics the work facilitates hands on and experiment driven learning in higher mathematics The print version contains the electronic text and simulations for offline use For questions concerning download or online access to the simulations please contact service.degruyter.com
