Greening Brownfields Remediation Through Sustainable Development:

Greening Brownfields William Sarni, 2010 *Sustainable Brownfield Development* Christopher De Sousa, 2021-07-14

While industrial and chemical innovations have contributed extensively to human advancement the darker part of their legacy has been the hundreds of thousands of polluted sites left behind Governments at all levels have rallied to support the remediation and reuse of these land resources and put many of the nation's brownfields back into productive use This book presents two dozen brownfield projects in the United States that have incorporated sustainability highlighting project features best management practices and lessons from the field regarding the underlying policies and practices that enabled these projects to be completed or in some cases stalled altered or abandoned The case studies represent an array of brownfield projects that aimed to go beyond conventional practice and include a range and variety of end uses e.g. corner gas stations industrial office residential brightfields green space mixed use and transit oriented developments The cases investigate site histories planning and development and examine sustainability characteristics to understand how projects overcame the barriers to brownfield reuse and the implementation of sustainability features and derive a series of lessons learned including innovative policies programs and/or funding mechanisms that helped make these projects work *Sustainable Brownfield Development* will be of interest to developers planners consultants and community representatives interested in environmental policy urban planning community development ecological restoration economic development and parks planning by providing direction and inspiration for those eager to erase the blight of the past and build a more sustainable future ***Sustainable Brownfield Regeneration*** Tim Dixon, Mike Raco, Philip Catney, David N. Lerner, 2008-04-15

Sustainable Brownfield Regeneration presents a comprehensive account of UK policies processes and practices in brownfield regeneration and takes an integrated and theoretically grounded approach to highlight best practice Brownfield regeneration has become a major policy driver in developed countries It is estimated that there are 64 000 hectares of brownfield land in England much of which presents severe environmental challenges and lies alongside some of the most deprived communities in the country Bringing such land back into active use has taken on a new urgency among policymakers developers and other stakeholders in the development process Frequently however policy thinking and practice has been underpinned by silo mentalities in which integrated and multidisciplinary approaches to problem solving have been limited The book has two principal aims The first is to examine the ways in which science and social science research disciplines can be brought together to help solve important brownfield regeneration issues with a focus on the UK The second is to assess the efficiency and effectiveness of different types of regeneration policy and practice and to show how liveable spaces can be produced from problem places The Thames Gateway in the south of England and Greater Manchester in the North of England are shown as examples of how brownfield regeneration projects are developing in an era where sustainability is high on the policy agenda From the Foreword by Paul Syms National Brownfield Advisor English Partnerships Ensuring the effective and

efficient reuse of brownfield land is an essential part of the British Government's land use policies in support of sustainable communities. This book recognises that reusing brownfield land is not just about overcoming technical issues to remove contamination or other physical problems with the ground. It highlights the importance of engaging with the many different stakeholders whose opinions and concerns need to be taken into account if sustainable outcomes are to be achieved. The authors also recognise that brownfield land reuse is not just about building new homes or places of employment; the creation of new green spaces can be just as important.

Green Issues and Debates Howard S. Schiffman, 2011-06-28 Colorful bracelets, funky brooches and beautiful handmade beads: young crafters learn to make all these and much more with this fantastic step-by-step guide. In 12 exciting projects with simple steps and detailed instructions, budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble. Following the successful Art Smart series, Craft Smart presents a fresh, fun approach to four creative skills: knitting, jewelry making, papercrafting and crafting with recycled objects. Each book contains 12 original projects to make using a range of readily available materials. There are projects for boys and girls carefully chosen to appeal to readers of all abilities. A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills.

Achieving Sustainability in Ukraine through Military Brownfields Redevelopment Cezar Morar, Laurel Berman, Serap Erdal, Liudmyla Niemets, 2024-12-30 This book is written by international experts who are brownfields practitioners from over 15 countries. Blighted and contaminated properties including military, industrial, commercial and multi-residential properties globally referred to as brownfields are a shared phenomenon among NATO and NATO partner countries. They provide practical solutions to addressing, evaluating and cleaning up brownfields, including multiple case studies. Topics include reuse of military brownfields, sustainable site reuse, community engagement, risk assessment, impacts of the war in Ukraine related to military brownfields, development and redevelopment, a free training to improve capacity to evaluate environmental and health risks of brownfields and shared best practices.

Building Systems Integration for Enhanced Environmental Performance Shahin Vassigh, Jason R. engineering Greening Cities Puay Yok Tan, Chi Yung Jim, 2017-03-29 This book offers an overview of recent scientific and professional literature on urban greening and urban ecology focusing on diverse disciplines such as landscape architecture geography urban ecology urban climatology biodiversity conservation urban governance architecture and urban hydrology It includes contributions in which academics public policy experts and practitioners share their considerable knowledge on the multi faceted aspects of greening cities The greening of cities has witnessed a global resurgence over the past two decades and has made a significant contribution to urban liveability and sustainability as well as increasing resilience As urban greening efforts continue to expand it is useful to promote recent advances in our understanding of various aspects of planning design and management of urban greenery but at the same time it is also important to realize that there are important gaps in our knowledge and that further research is needed The book is organized in three main parts concepts functions and forms of urban greening The first part examines the historical roots of greening cities and how the burgeoning field of urban ecology can contribute useful principles and strategies to guide the planning design and management of urban greening The second part shifts the focus to the diverse range of services the functions provided by urban greening such as those related to urban climate urban biodiversity human health and community building The final part explores conventional often neglected but important forms of urban greenery such as urban woodlands and urban farms as well as relatively recent forms of urban greenery like those integrated with buildings and waterways It offers a ready reference resource for researchers practitioners and policy makers to grasp the critical issues and trigger further studies and applications in the quest for high performance green cities **Mysterious Abandoned Places** Benjamin Ramirez, AI, 2025-03-31 Mysterious

Abandoned Places explores the captivating stories behind forgotten cities decaying theme parks and other crumbling structures It examines the intricate interplay of history architecture and societal shifts that led to their desertion highlighting how these spaces reflect and shape human experience Abandoned places are not just remnants of failure they are archives of human ambition resilience and the unintended consequences of progress For instance the book delves into the economic drivers behind urban decay such as resource depletion that leaves boomtowns desolate The book progresses by examining economic factors and the social ramifications of urban decay the phenomenon of theme park abandonment and the role of geopolitical instability and environmental disasters By presenting rigorous historical research and firsthand accounts this book provides a comprehensive and nuanced understanding of the circumstances surrounding each abandonment This interdisciplinary study connects to fields such as urban planning sociology and environmental studies offering insights into sustainable development and responsible resource management making it a valuable resource for a broad audience

Sustainable Regeneration of Former Military Sites Samer Bagaeen, Celia Clark, 2016-06-10 Sustainable Regeneration of Former Military Sites is the first book to analyze a profound land use change happening all over the world the search for sustainable futures for property formerly dedicated to national defense now becoming redundant disposed of

and redeveloped The new military necessity for rapid flexible response requires quite different physical resources from the massive fixed positions of the Cold War with huge tracts of land and buildings looking for new uses The transition from military to civilian life for these complex contaminated isolated heritage laden and often contested sites in locations ranging from urban to remote is far from easy There is very little systematic analysis of what follows base closures leaving communities governments developers and planners experimenting with untested land use configurations partnership structures and financing strategies With twelve case studies drawn from different countries many written by those involved Sustainable Regeneration of Former Military Sites enables the diverse stakeholders in these projects to discover unique opportunities for reuse and learn from others experiences of successful regeneration
