Greening In The Red Zone Disaster Resilience And Community Greening:

Greening in the Red Zone Keith G. Tidball, Marianne E. Krasny, 2013-07-22 Creation and access to green spaces promotes individual human health especially in therapeutic contexts among those suffering traumatic events But what of the role of access to green space and the act of creating and caring for such places in promoting social health and well being Greening in the Red Zone asserts that creation and access to green spaces confers resilience and recovery in systems disrupted by violent conflict or disaster This edited volume provides evidence for this assertion through cases and examples The contributors to this volume use a variety of research and policy frameworks to explore how creation and access to green spaces in extreme situations might contribute to resistance recovery and resilience of social ecological systems

sustainability and urban resilience The idea of sustainable development is still very much central in the new development agenda of the United Nations and in that sense it is of particular importance for students from both the Global South and Global North Professionals researchers and students alike will find this book to be an invaluable resource for understanding and solving problems relating to sustainable urban planning and management *Urban Environmental Stewardship and Civic Engagement* Dana R. Fisher,Erika S. Svendsen,James Connolly,2015-02-11 Once considered the antithesis of a verdant and vibrant ecosystem cities are now being hailed as highly efficient and complex social ecological systems Emerging from the streets of the post industrial city are well tended community gardens rooftop farms and other viable habitats capable of supporting native flora and fauna At the forefront of this transformation are the citizens living in the cities themselves As people around the world increasingly relocate to urban areas this book discusses how they engage in urban stewardship and what civic participation in the environment means for democracy Drawing on data collected through a two year study of volunteer stewards who planted trees as part of the MillionTreesNYC initiative in the United States this book examines how projects like this can make a difference to the social fabric of a city It analyses quantitative survey data along with qualitative interview data that enables the volunteers to share their personal stories and motivations for participating revealing the strong link between environmental stewardship and civic engagement As city governments in developed countries are investing more and more in green infrastructure campaigns to change the urban landscape this book sheds light on the social importance of these initiatives and shows how individuals efforts to reshape their cities serve to strengthen democracy It draws out lessons that are highly applicable to global cities and policies on sustainability and civic engagement Greening Cities Puay Yok Tan,Chi Yung Jim,2017-03-29 This book offers an overview of recent scientific and professional literature on urban greening and urban ecology focusing on diverse disciplines such as landscape architecture geography urban ecology urban climatology biodiversity conservation urban governance architecture and urban hydrology It includes contributions in which academics public policy experts and practitioners share their considerable knowledge on the multi faceted aspects of greening cities The greening of cities has witnessed a global resurgence over the past two decades and has made a significant contribution to urban liveability and sustainability as well as increasing resilience As urban greening efforts continue to expand it is useful to promote recent advances in our understanding of various aspects of planning design and management of urban greenery but at the same time it is also important to realize that there are important gaps in our knowledge and that further research is needed The book is organized in three main parts concepts functions and forms of urban greening The first part examines the historical roots of greening cities and how the burgeoning field of urban ecology can contribute useful principles and strategies to guide the planning design and management of urban greening The second part shifts the focus to the diverse range of services the functions provided by urban greening such as those related to urban climate urban biodiversity human health and community building The final part explores conventional often neglected but

important forms of urban greenery such as urban woodlands and urban farms as well as relatively recent forms of urban greenery like those integrated with buildings and waterways It offers a ready reference resource for researchers practitioners and policy makers to grasp the critical issues and trigger further studies and applications in the quest for high performance green cities *Sustainable Solutions: University-Community Partnerships* B.D. Wortham-Galvin,Jennifer H. Allen,Jacob Sherman,2017-09-08 What is the role of the university Current systems may stress research output but Wortham Galvin Allen and Sherman seek to re establish the importance of teaching and service in the work of the 21st century university The Sustainable Solutions series shares Portland State University s experience of community engaged teaching and research With a focus on sustainability we see that such collaboration is vital to making Portland one of the world s most sustainable cities Volume 2 University Community Partnerships builds on the themes introduced in Volume 1 Let Knowledge Serve the City to explore how these partnerships play out in practice Covering 13 projects which range from supporting local artisans and researching food access to sharing Indigenous history and decolonizing perceptions of knowledge readers receive pragmatic advice on working with community organizations Authors also offer critical reflection on how theories of engagement have structured PSU s work and how their findings impact our very understanding of partnership This reader friendly text provides an ideal introduction to anyone wishing to learn more about models of effective collaboration and how to put these into practice Explained through the context of specific projects the book offers both inspiration and practical guidance to anyone in local government academia or the third sector looking to set up productive community university partnerships *Cities at Risk* Pierre Filion,Gary Sands,2016-03-03 As levels of urbanization increase around the world the growing concentrations of population and economic activity increases vulnerability to natural disasters Interdependencies among urban populations mean that damage to the built environment including water sewer and energy infrastructure can affect millions Even if there is no change in the rate of occurrence of natural disasters an unlikely prospect in the face of ongoing climate change the potential for human and economic loss will continue to increase along with the time required to recover How do cities prepare for and recover from natural disasters In this book the authors provide a broad overview of the issues related to the impacts of disasters on cities around the world from assessing risks to accounting for damages The comparative approach across different types of disasters in a range of urban locations is useful in identifying opportunities for policy transfer While there is no one size fits all solution to hazard mitigation valuable lessons can be learned from the experiences of others The chapters emphasize different modes for assessing hazard risk as well as strategies for increasing the resiliency of vulnerable populations *The Routledge Handbook on the Influence of Built Environments on Diverse Childhoods* Kate Bishop,Katina Dimoulis,2024-07-01 Children and young people are often discussed as if they are homogenous groups The reality is of course very different with an enormous variation within each of these groups and in any domain of experience pertaining to childhood or adolescence Driven by personal sociocultural geographic or economic

circumstances many children and young people worldwide are experiencing a totally different reality to those who fit with more mainstream patterns of childhood. This has substantial implications for their sociophysical environmental experience and our understanding of their physical environmental needs. The aim of this book is to draw attention to these alternate realities for a number of these groups of children and young people, highlighting the unique and different considerations associated with their particular circumstances in each instance and identifying the repercussions for their physical environmental needs. Ultimately, this book creates an evidence-based discussion which can be used by designers, planners, and policy makers and those delivering services and programs to children and young people as a basis to make informed decisions on how to work with the groups of children and young people in our book for better environmental provision.
