## **Manual Nikon P51:**

**P-51 Mustang in Detail & Scale, Part 2** Bert Kinzey, Haagen Klaus, Rock Roszak, 2025-05-20 The P 51 Mustang was one of only a very few military aircraft that could be conclusively called a war winning design. It was a truly remarkable aircraft design that evolved from a beautiful aerodynamic prototype that was created in just a few short months into an aircraft that finally allowed the American strategy of daylight precision bombing to be successfully and effectively achieved. This publication is the second part of a three volume set of books in the Detail Scale Series that present a detailed look at the North American P 51 Mustang and its British counterparts. Part 1 covered the early Allison powered variants and this volume takes a look at the early Merlin powered Mustangs including the P 51B, P 51C, F 6C and the Mustang Mk III. Part 3 will cover the P 51D and later variants of the Mustang including their photo reconnaissance and British versions. Following the introduction, the first chapter summarizes the developmental and operational history of these Mustang variants which saw the excellent and combat proven North American design turned into a superb high altitude fighter with the change to the Rolls Royce Merlin engine. Produced in large quantities at two facilities, the P 51Bs and P 51Cs served in every theater of the war and proved themselves to be among the most outstanding fighters of World War II. Those converted to the F 6C photo reconnaissance sub variant provided valuable intelligence information to Allied commanders. Others ordered by the British as the Mustang Mk III served in the Royal Air Force and with other Commonwealth Air Forces. The next chapter takes a closer look at each variant of these early Merlin powered Mustangs with a separate section for each. These not only include the production versions but the Mustang Mk X and XP 51B experimental and developmental aircraft are also covered as is the F 6C photo reconnaissance sub variant. The text in each section is complemented with photographs and art profiles are included for each of the production variants. Following the variants chapter is a gallery of photographs that illustrate the different paint schemes and some of the markings used on these early Merlin powered Mustang variants. As with all volumes in the Detail Scale Series, the primary focus is on the details of the aircraft and the details chapter includes ten different sections in which there are more than one hundred detail photographs and illustrations, most of which are in color and many were taken specifically for this publication. The book concludes with our usual Modelers Section where scale modelers will find concise and objective reviews of the kits available of the early Merlin powered Mustang variants. All standard modeling scales are covered and recommendations are made as to how to correct inaccuracies and add details to the kits. P 51 Mustang in Detail Scale Part 2 has over 220 high resolution photographs, over 100 of which are in full color, plus eight illustrations and 14 full color profiles.

**P-51 Mustang in Detail & Scale, Part 1** Bert Kinzey, Haagen Klaus, 2025-02-03 P 51 Mustang in Detail Scale Part 1 is the first in a three volume series from Detail Scale Aviation Publications that covers the North American P 51 Mustang, one of the most iconic fighter aircraft ever designed. The book is focused on the early Mustangs, those equipped with the Allison engine, and it fully covers these aircraft from the NA 73X prototype through the P 51A.

including the photographic reconnaissance F 6A and F 6B derivatives and the early British variants the Mustang Mk I Mk IA and Mk II Subsequent volumes will be P 51 Mustang in Detail Scale Part 2 which will cover the Rolls Royce Packard engined P 51B and C models and P 51 Mustang in Detail Scale Part 3 which looks at the iconic P 51D and the subsequent variants P 51 Mustang in Detail Scale Part 1 begins with a history of the development and operational use of the Allison engined variants The P 51 Mustang initially came into being to help provide the British with as many first line fighters as possible at a time when they were needed the most as Germany prepared to invade England Lt Benjamin Kelsey the head of the Army Air Corps Pursuit Projects Office at Wright Field Ohio used his knowledge of aerodynamics and his ingenuity to ensure that the U S Army would also acquire the Mustang as America s entry into World War II became more imminent with each passing day The history chapter not only covers the development of the early Mustang variants but it also summarizes their valuable contributions to the Allied war effort The next chapter takes a closer look at each of the Allison engined variants pointing out their differences and features with informative text and photographs The A 36 dive bomber version gets special treatment with no less than thirty seven photographs many of which illustrate its unique features and details The variants chapter covers both the fighter and photo recon variants of each version Scale drawings are provided for the production variants and differences and unique features are indicated on these drawings Next comes the Allison engined Mustang Details chapter that provides in depth coverage of the common details of these variants Nine different sections in this chapter include more than 140 photographs that illustrate the details more extensively than any other publication 139 of these photographs are in color and most were taken specifically for Detail Scale As with all Detail Scale Series publications the book concludes with a Modelers Section that reviews the scale model kits of the Allison engined Mustangs that have been issued to date These objective reviews point out the good and not so good points about each kit and make recommendations as to which ones are best for scale modelers to use P 51 Mustang in Detail Scale Part 1 has 245 high resolution photographs over 175 of which are in full color plus ten scale drawings and seven full color aircraft profiles
