Biosafety in Microbiological and Biomedical Laboratories ,2009 Zoonoses: Infections Affecting Humans and Animals Andreas Sing,2023-10-09 This second fully revised and extended edition of Zoonoses Infections Affecting Humans and Animals covers the most important pathogens impacting both human and animal public health and debates current developments in this interdisciplinary field from a One Health perspective Following a setting approach the individual chapters each review zoonoses occurring in a specific group of animals such as production animals pets or wildlife or in a defined ecosystem A focus is put on zoonoses emerging along the food chain and on antibiotic resistance as an increasing challenge in infectious disease management Special interest chapters debate non resolved and currently hotly debated zoonoses foremost COVID 19 influenza Crohn paratuberculosis and chronic botulism also taking into account the economic and ecological aspects of zoonotic disease outbreaks This second edition includes brand new chapters on emerging pathogens such as SARS CoV 2 chlamydia and helminths it reviews historic zoonoses provides additional insights into pathogens of reptiles and highlights significant neglected tropical diseases This reference work is a must read for researchers health professionals and students in Microbiology and Veterinary Medicine The book s ambition to spread knowledge on zoonoses and on strategies on how to tackle them complies with the United Nations Sustainable Goals in particular Goal 3 Good Health and Well Being

WHO Expert Consultation on Rabies World Health Organization,2013 Although there is debate about the estimated health burden of rabies the estimates of direct mortality and the DALYs due to rabies are among the highest of the neglected tropical diseases Poor surveillance underreporting in many developing countries frequent misdiagnosis of rabies and an absence of coordination among all the sectors involved are likely to lead to underestimation of the scale of the disease It is clear however that rabies disproportionately affects poor rural communities and particularly children Most of the expenditure for post exposure prophylaxis is borne by those who can least afford it As a result of growing dog and human populations the burden of human deaths from rabies and the economic costs will continue to escalate in the absence of concerted efforts and investment for control Since the first WHO Expert Consultation on Rabies in 2004 WHO and its network of collaborating centres on rabies specialized national institutions members of the WHO Expert Advisory Panel on Rabies and partners such as the Gates Foundation the Global Alliance for Rabies Control and the Partnership for Rabies Prevention have been advocating the feasibility of rabies elimination regionally and globally and promoting research into

sustainable cost effective strategies Those joint efforts have begun to break the cycle of rabies neglect and rabies is becoming recognized as a priority for investment This Consultation concluded that human dog transmitted rabies is readily amenable to control regional elimination in the medium term and even global elimination in the long term A resolution on major neglected tropical diseases including rabies prepared for submission to the World Health Assembly in May 2013 aims at securing Member States commitment to the control elimination or eradication of these diseases Endorsement of the resolution would open the door for exciting advances in rabies prevention and control Publisher s description
