Global Sustainability Prosun Bhattacharya, Marie Vahter, Jerker Jarsjö, Jurate Kumpiene, Arslan Ahmad, Charlotte Sparrenbom, Gunnar Jacks, Marinus Eric Donselaar, Jochen Bundschuh, Ravi Naidu, 2016-06-08 The Congress Arsenic in the Environment offers an international multi and interdisciplinary discussion platform for research and innovation aimed towards a holistic solution to the problem posed by the environmental toxin arsenic with considerable societal impact The congress has focused on cutting edge and breakthrough research in physical chemical toxicological medical agricultural and other specific issues on arsenic across a broader environmental realm The Congress Arsenic in the Environment was first organized in Mexico City As2006 followed by As2008 in Valencia Spain As2010 in Tainan Taiwan As2012 in Cairns Australia and As2014 in Buenos Aires Argentina The 6th International Congress As2016 was held June 19 23 2016 in Stockholm Sweden and was entitled Arsenic Research and Global Sustainability The Congress addressed the broader context of arsenic research along the following themes Theme 1 Arsenic in Environmental Matrices and Interactions Air Water Soil and Biological Matrices Theme 2 Arsenic in Food Chain Theme 3 Arsenic and Health Theme 4 Clean Water Technology for Control of Arsenic Theme 5 Societal issues Policy Studies Mitigation and Management Long term exposure to low to medium levels of arsenic via contaminated food and drinking water can have a serious impact on human health and globally more than 100 million people are at risk Since the end of the 20th century arsenic in drinking water mainly groundwater has emerged as a global health concern In the past decade the presence of arsenic in plant foods especially rice has gained increasing attention In the Nordic countries in particular the use of water soluble inorganic arsenic chemicals e g chromated copper arsenate CCA as wood preservatives and the mining of sulfidic ores have been flagged as health concern The issue has been accentuated by discoveries of naturally occurring arsenic in groundwater primarily in the private wells in parts of the Fennoscandian Shield and in sedimentary formations with potentially detrimental effects on public health Sweden has been at the forefront of research on the health effects of arsenic technological solutions for arsenic removal and sustainable mitigation measures for developing countries Hosting this Congress in Sweden was also relevant because historically Sweden has been one of the leading producer of As₂O₃ and its emission from the smelting industries in northern Sweden and has successfully implemented actions to reduce the industrial emissions of arsenic as well as minimizing the use of materials and products containing arsenic in since 1977 The Congress has gathered professionals involved in different segments of interdisciplinary research in an open forum and strengthened relations between academia industry research laboratories government agencies and the private sector to share an optimal atmosphere for exchange of knowledge discoveries and discussions about the problem of arsenic in the environment and catalyze the knowledge generation and innovations at a policy context to achieve the goals for post 2015 Sustainable Development **A Watershed Year** Cornelia F. Mutel, 2010-03-15 In June 2008 the rivers of eastern Iowa rose above their banks to create floods of epic proportions their amazing size flowing in places at a rate nearly double that of the previous record flood and the rapidity of their rise ruined

farmlands and displaced thousands of residents and hundreds of businesses In Cedar Rapids the waters inundated more than nine square miles of the downtown area in Iowa City where the flood was also the most destructive in history the University of Iowa's arts campus was destroyed By providing a solid base of scientific and technical information presented with unusual clarity and a wealth of supporting illustrations the contributors to this far reaching book many of whom dealt firsthand with the 2008 floods provide a detailed roadmap of the causes and effects of future devastating floods The twenty five essays fall naturally into four sections Rising Rivers Spreading Waters begins by comparing the 2008 floods with the midwestern floods of 1993 moves on to trace community responses to the 2008 floods and ends by illuminating techniques for forecasting floods and determining their size and frequency Why Here Why Now searches for possible causes of the 2008 floods and of flooding in general annual crops and urban landscapes inflows into and releases from reservoirs and climate change Flood Damages Flood Costs Flood Benefits considers the complex mix of flood costs and effects emphasizing damages to cities and farmlands as well as potential benefits to natural communities and archaeological sites Looking Back Looking Forward lays out approaches to managing the floods of the future that are sure to come While the book draws most of its examples from one particular region it explains flooding throughout a much larger region the midwestern Corn Belt and thus its sobering yet energizing lessons apply well beyond eastern Iowa By examining the relationships among rivers floodplains weather and modern society by stressing matters of science and fact rather than social or policy issues and by addressing multiple environmental problems and benefits A Watershed Year informs and educates all those who experienced the 2008 floods and all those concerned with the larger causes of flooding
