Pediatric Hematology-Oncology in Countries with Limited Resources Daniela Cristina Stefan, Carlos Rodriguez-Galindo, 2013-11-18 Typically manuals of pediatric hematology oncology are written by specialists from high income countries and usually target an audience with a sub specialist level of training often assisted by cutting edge diagnostic and treatment facilities However approximately 80% of new cases of cancer in children appear in mid and low income countries Almost invariably general practitioners or general pediatricians without special training in oncology will look after children with malignancies who enter the health care system in these countries The diagnostic facilities are usually limited as are the treatment options The survival figures in these conditions are somewhere below 20% while in high income countries they are in the range of 80% for many childhood cancers Pediatric Hematology Oncology in Countries with Limited Resources is the only book of its kind to provide specific guidance applicable to limited resource settings and builds up from the foundation of general practitioner or general pediatrician competence Written and edited by leaders in the field this manual educates physicians on the essential components of the discipline filtered through the experience of specialists from developing countries with immediate applicability in the specific healthcare environment in these countries

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *Handbook of Childhood Behavioral Issues* Thomas P. Gullotta, Gary M. Blau, 2007-09-19 Recent years have seen increasing interest in the mental health field particularly related to strategies that foster the positive behavior and healthy mental state of children As the Handbook of Childhood Behavioral Issues indicates however the causes of childhood behavioral physical and mental health problems are multi dimensional and cannot be treated with a uniform approach Rather than focus solely on theory this book offers evidence of effective interventions as well as extensive bio psychosocial methods of preventative practices The research confirms the impact that environment has on children and offers new approaches to address physical mental health and behavioral issues in children This volume is broken down into chapters that concentrate on a specific behavior or disorder which not only makes the information comprehensible but also allows for in depth coverage of a particular issue In addition to considering the genetic and psychological factors that trigger childhood mental health problems the handbook

also investigates the significant impact that family members and the surrounding community have on a child's life. It is a book uniquely designed to include both the current perspectives on childhood development and the most effective treatment and prevention options. The result is a book that provides a deeper understanding of the variety of factors that contribute to a child's behavior along with important information on the progress of evidence-based practices.

Acute Care Oncology Nursing Cynthia C. Chernecky, Kathleen Murphy-Ende, 2008-04-24 As the likely first responder in an emergency, you need quick access to essential information on the potential complications of many different cancer types and treatments. The new edition of this trusted resource provides up-to-date information on the pathophysiology, complications, risks, treatment approaches, prognosis, assessment findings, and nursing and medical interventions for a wide range of cancers. It also offers valuable information to help you fulfill your role as care coordinator and patient advocate, including client education, guidelines, discharge procedures, and strategies for helping the client and family deal with the impact of the disease's progression. A consistent format throughout helps you quickly find the information you need, no matter what the topic. This indispensable reference is written and reviewed by both oncology and acute care nurses, ensuring accuracy, currency, and clinical relevance. Coverage of each cancer includes pathophysiologic mechanisms, epidemiology, and etiology, risk profile, prognosis, professional assessment criteria, PAC nursing care, and treatment evidence, based practice, update, patient teaching, nursing diagnoses, or DSM-IV evaluation, and desired outcomes, and discharge planning with follow-up care, where needed. The latest prognosis statistics give you a realistic picture of the survival possibilities for your patients, so you can provide the most appropriate nursing care and patient education. Multiple-choice review questions with answers and rationales at the end of each chapter help reinforce your understanding of key concepts and prepare you for certification examinations. Special boxes highlight pediatric-specific care considerations for working with children. Six new chapters: Biliary and Pancreatic Obstruction, Depression and Cognitive Dysfunction, Dyspnea and Airway Obstruction, GI Obstruction, Heart Failure, and Spiritual Distress, keep you up-to-date with the latest advances in oncology nursing. Evidence-based rationales in the nursing interventions help you apply the latest research findings to actual practice. Each chapter includes a new section on pathophysiology to help you understand the physiologic processes associated with each oncologic complication.

Handbook of Pediatric Chronic Pain Brenda C. McClain, Santhanam Suresh, 2011-06-15 The purpose of this text is to provide not only the science and current knowledge of pediatric pain management but a rationale for intervention. The book is ground-breaking in that it provides pearls for the recognition and management of multiple childhood chronic pain syndromes. Also uncommon yet confounding issues such as pain management for epidermolysis bullosa are adequately addressed. Concerns unique to pediatric patients are reviewed. While there are no firm standards in pediatric chronic pain, a care plan is offered to help guide practitioners when possible. The book will consist of 24 chapters, many co-written by a physician and a psychologist. Chapter 1 covers the history of pediatric chronic pain, the advancement of pediatric pain as a

clinical subspecialty development of pediatric pain clinics and characterization of the common pain syndromes Chapters 2 4 cover respectively the research on early pain exposure and neuroplasticity theories on the common adolescent pain syndromes and the demographics of chronic pain in children Chapters 5 16 discuss approaches to assessment and intervention for specific pediatric and adolescent pain syndromes Chapters 17 23 address interventional techniques such as therapeutic blocks neurablation implantable systems physical therapy complementary therapy and pharmacology including opioid tolerance The final chapter discusses the role of the nurse practitioner in pediatric chronic pain
