Grassroots Innovation Movements Pathways Sustainability:

Grassroots Innovation Movements Adrian Smith, Mariano Fressoli, Dinesh Abrol, Elisa Arond, Adrian Ely, 2016-08-25

Innovation is increasingly invoked by policy elites and business leaders as vital for tackling global challenges like sustainable development. Often overlooked however is the fact that networks of community groups, activists and researchers have been innovating grassroots solutions for social justice and environmental sustainability for decades. Unencumbered by disciplinary boundaries, policy silos or institutional logics, these grassroots innovation movements identify issues and questions neglected by formal science, technology and innovation organizations. Grassroots solutions arise in unconventional settings through unusual combinations of people, ideas and tools. This book examines six diverse grassroots innovation movements in India, South America and Europe, situating them in their particular dynamic historical contexts. Analysis explains why each movement frames innovation and development differently, resulting in a variety of strategies. The book explores the spaces where each of these movements have grown or attempted to do so. It critically examines the pathways they have developed for grassroots innovation and the challenges and limitations confronting their approaches. With mounting pressure for social justice in an increasingly unequal world, policy makers are exploring how to foster more inclusive innovation. In this context, grassroots experiences take on added significance. This book provides timely and relevant ideas, analysis and

recommendations for activists, policy makers, students and scholars interested in encounters between innovation, development and social movements.

Critiquing Communication Innovation Rolien Hoyng, Gladys Pak Lei Chong, 2022-06-01 Challenges to Silicon Valley's dominant role in conjuring and patenting the world's technological futures are arising around the world. As digital media technologies emerge from new globally dispersed locations, a multipolar order of communication innovation seems to be in the making. Yet recovering our ability to imagine futures otherwise requires negotiating conditions economic, geopolitical, sociocultural, and ecological rather than reproducing them under the pretext of breaking with the present. The essays in this volume examine research on such conditions critically and comparatively in a variety of geographies. Paying due attention to China's rise as an innovative platform society and AI powerhouse, this book addresses the broader question of a shifting world order and trends that are shaped by China's influence but that extend beyond its borders. Looking at multipolar communication innovation through various critical lenses, our technological futures simultaneously appear to be old, new, and uncertain while the infrastructures and platforms underpinning communication innovation both affiliate communities and set them apart.

Co-Creation Tobias Redlich, Manuel Moritz, Jens P. Wulfsberg, 2018-11-19 Across several industries we are observing a paradigm shift from traditional firm-centric and top-down value creation to more open and collaborative approaches also referred to as bottom-up economics. The boundaries of firms dissolve and external actors, customers, user suppliers, etc. enter the domain of value creation by means of advanced information and communication technologies. These new and evolving patterns require a renewed and interdisciplinary understanding of how co-creation enables organizations to reshape business and society. With contributions from industrial and academic experts, this book provides deep insights into the theory and practice of bottom-up economics and addresses the major opportunities and challenges that have emerged in the era of co-creation. A must-read for decision makers looking to innovate their companies' business models from ideation to marketing.

Dr. Ing. Michaela Colla, K. GXI Leader Industry 4.0 at Volkswagen. Simply put, co-creation is the future of work. With technology morphing the way we work and young people wanting to tackle problems that matter, co-creation is the sandbox where the world can come together to solve big challenges. Plus, co-creation rapidly delivers products with built-in market fit.

Megan Brewster, Vice President of Advanced Manufacturing at Launch FORTH. Successful leaders will co-create the future. This book is an excellent starting point.

Jürgen Bilo, Managing Director, co-pace GmbH, The Startup Organisation of Continental AG.

Sustainability in Transition Travis Gliedt, Kelli Larson, 2018-07-04 Sustainability in Transition: Principles for Developing Solutions offers the first in-depth education-focused treatment of how to address sustainability in a comprehensive manner. The textbook is structured as a learning-centered approach to walk students through the process of linking sustainable behavior and decision making to green innovation systems and triple bottom-line economic development practices in order to achieve sustainable change in incremental to transformational ways. All chapters combine theory and practice with the help of global case study.

and research study examples to illustrate barriers and best practices Each chapter begins with learning objectives and ends with a check on learning section that ties the main points back to the core themes of the book Chapters include a section focused on measuring progress and a box comparing international research or case studies to the North American focus of the chapter A list of additional academic sources for students that complement each chapter is included Building sustainability tools techniques and competencies cumulatively with the help of problem and project based learning modules Sustainability in Transition Principles for Developing Solutions is a comprehensive resource for learning sustainability theory and doing sustainability practice It will be essential reading for advanced undergraduate and graduate level students who have already completed introductory sustainability classes

Territorial Policy and Governance Iain Deas, Stephen Hincks, 2017-02-24 In response to both policy and conceptual debates alternative narratives have begun to emerge about territorial governance and policymaking As local and regional policy actors strive to respond to the geographically uneven effects of the economic crises of the early twenty first century a crucial question emerges what are the opportunities and challenges presented by alternative forms of territorially based governance and policy The aim of this edited volume therefore is critically to explore the opportunities and challenges presented by different forms of territorial policy and governance Drawing on conceptual debates and empirical research from the United Kingdom and other international contexts the contributors engage with issues around the politics and governance of territorial development economic development planning and regeneration and the environment Territorial Policy and Governance addresses the question of how alternative forms of territorial governance and policy can help to shape patterns of urban and regional development highlighting the related opportunities constraints and challenges that confront their operationalisation This book will be essential reading for international audiences with an interest in territorial development governance politics human geography and planning and regeneration

New Models of Inclusive Innovation for Development Richard Heeks, Christopher Foster, Yanuar Nugroho, 2017-10-02 Inequality and innovation are both rising issues on the international development agenda Their intersection is inclusive innovation defined as the inclusion within some aspect of innovation of groups who are currently marginalised This is a topic of increasing interest and activity Large firms have been working to deliver innovative goods and services for base of the pyramid consumers the c 3 billion who live on less than US 2 per day Within poor communities an influx of new technology finance and capabilities has spurred more localised innovation A variety of different models have been identified by which this activity is organised and implemented such as inclusive innovation clusters grassroots innovation frugal innovation innovation platforms and inclusive user producer interactions This book explores the operation conceptualisation and impact of these models and analyses the nature of inclusive innovation practice and research It will be of interest to researchers policy makers strategists and other practitioners associated with these new forms of innovation This book was originally published as a special issue of Innovation and Development
