GRAVITATION ZOLTAN J. KISS, 2013-08-07 Gravitation the sphere symmetrical expanding acceleration of Earth means Earth's surface is falling under our feet The surface of the Earth is accelerating together with us We are taken by the surface of the Earth Earth's surface is approaching us as if having been in free fall While we have all the evidence to prove it through all of our everyday life and all of our actions it is so strange that it is difficult to believe We do not trust our intuition or experience because it is so unbelievable This book on Gravitation our Quantum Treasure does not want to convince you of the truth of the above The purpose of the book is to show that Nature is granting us the chance to use the infinite energy capacity of gravitation The future is about motion and electricity generation based on gravitation The book's conclusions are based on process approach on quantum energy and mass balance on elementary proton neutron electron quark and other processes on the definition of time and the understanding of intensity Our life is constantly changing The key is the balance The book gives arguments and explanations describes events on quantum basis It provides the perspective for the utilisation of Gravitation our Quantum Treasure

The Quantum Impulse and the Space-Time Matrix Zoltan J. Kiss, 2015-07-08 The Quantum Impulse and the Space Time Matrix is Zoltan J Kiss fifth book in a row proposing a different scientific way of viewing the world namely that the world is based on events Elements and elementary components are processes This is the only way the definition of time has its sense at all levels of the elementary evolution from the plasma to the Hydrogen process The quantum impulse of infinite low intensity the energy quantum is the entropy product of the elementary cycle It is the building stone of the quantum system of the space time Quantum impulses transfer quantum impacts signals light and all quantum information in any direction by the speed of quantum communication Whatever the impacting signal is the energy quantum remains as it was before infinitely small never expiring quantum impulse without change The space time is about the speed and the intensity of the quantum communication The space time matrix is the complexity of space times with the infinite large variety of the speed of quantum communication Anti processes control the elementary balance of the elementary processes and ensure the continuity of the elementary evolution The surplus of the anti electron processes is the source of the quantum impact of gravitation Gravitation is the sphere symmetrical expanding acceleration of the Earth our quantum treasure With these new insights this book provides the theoretical proofs and the practical evidence for immediate large scale experiments with the Hydrogen process and the Pyramid construction to solve the world's energy problems using Nature's gifts of gravitation and elementary processes

Quantum Blue Zoltan J. Kiss, 2019-11-12 Quantum Blue the Free Energy Energy is all around us but we only see it if we look at our world through events processes and intensities This book is the seventh in the row representing this approach After the clarification of the basics of the relativity the explanation of the elementary processes the definition of the time and the space after the full understanding of the gravity this book explains the principles of the magnetic and electromagnetic fields It gives the explanation of the impacts of the anti electron

processes the powers of magnetic attraction the magnetic repulsion and the magnetic transportation of the elementary processes The quantum impact of gravitation is always the source of conflict The quantum impact is weak but its supply is permanent The pyramids are the treasure houses of this power They are the potential energy source of the future The conflict of the Hydrogen process in acceleration and the quantum impact of gravitation generate energy on an industrial scale It is clean limitless and free Gravitation is our never ending source of energy Whether we use it or not is our choice Let's use it *Gravitation, Quantum Fields and Superstrings* ,1988
