Great Inventors Illustrated

Samuel Orchart Beeton

Great Inventors Illustrated:

Great Inventors and Their Inventions Frank P. Bachman, 2017-06-22 THIS book contains twelve stories of great inventions with a concluding chapter on famous inventors of today Each of the inventions described has added to the comforts and joys of the world Each of these inventions has brought about new industries in which many men and women have found employment These stories therefore offer an easy approach to an understanding of the origin of certain parts of our civilization and of the rise of important industries The story of each invention is interwoven with that of the life of its inventor The lives of inventors furnish materials of the highest educative value These materials are not only interesting but they convey their own vivid lessons on how big things are brought about and on the traits of mind and heart which make for success It is hoped that this book will set its readers to thinking how the conveniences of life have been obtained and how progress has been made in the industrial world While appealing to their interest in inventions and in men who accomplish great things may it also bring them into contact with ideas which will grip their hearts fire the imagination and mold their ideals into worthier forms *American Inventions and Inventors (Illustrations)* Arthur May Mowry, William A.

Mowry, 2014-11-18 A school history should set forth such facts and in such an order as to show the progress of civilization The great lessons of history are found in that line of events in the past which exhibits the progress of mankind the uplift of humanity The record of no other country can present a more startling array of forward movements and upward tendencies than that of our own land and in no one direction does this upward movement appear quite so clearly as in the line of inventions Man's efforts are first to overcome nature Food shelter and clothing are his primary wants After these are supplied he rises to higher realms of thought and action Then he nourishes his intellect exercises his sensibilities and provides nutriment for his soul that it also may grow In this book the above logical order is followed It is painfully evident that many schoolchildren dislike the study of history The authors of this book believe that this need not be It is clear that the study should be undertaken at an earlier age than is usually the case in our public schools It is not necessary and oftentimes not desirable that the books of history should be studied as text books Frequently they should be used as reading books Such use is more likely to develop in the minds of the younger children a love for history This book while adapted to older persons has been prepared with special reference to the needs and capacities of children from ten to twelve years of age It is commended to teachers and parents with full confidence that they will find it useful and that the children will be both interested and profited by its perusal Stories of Great Inventors Hattie E. Macomber, 2009-02 Robert Fulton 1765 1815

was an American engineer and inventor who is widely credited with developing the first commercially successful steamboat He also designed a new type of steam warship In 1800 he was commissioned by Napoleon Bonaparte to design Nautilus which was the first practical submarine in history Eli Whitney 1765 1825 was an American inventor best known as the inventor of the cotton gin This was one of the key inventions of the industrial revolution and shaped the economy of the

antebellum South Whitney's invention made short staple cotton into a profitable crop which strengthened the economic foundation of slavery Samuel Finley Breese Morse 1791 1872 was an American painter of portraits and historic scenes the creator of a single wire telegraph system and Morse Code Peter Cooper 1791 1883 was an American industrialist inventor philanthropist and candidate for President of the United States Thomas Alva Edison 1847 1931 was an American inventor and businessman who developed many devices that greatly influenced life around the world including the phonograph and the long lasting practical electric light bulb
