Greenhouse Farming Manual In Kenya:

Recarbonizing global soils – A technical manual of recommended sustainable soil management Food and Agriculture Organization of the United Nations, Intergovernmental Technical Panel on Soils, 2021-09-08 During the last decades soil organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15 Protect restore and promote sustainable use of terrestrial ecosystems sustainably manage forests combat desertification and halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1 This technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments including the advantages drawbacks and constraints This manual presents different sustainable soil management SSM practices at different scales and in different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications Volume 3 includes a total of 49 practices that have a direct impact on SOC sequestration and maintenance in cropland grassland integrated systems and farming approaches

Methods for Measuring Greenhouse Gas Balances and Evaluating Mitigation Options in Smallholder Agriculture Todd S. Rosenstock, Mariana C. Rufino, Klaus Butterbach-Bahl, Lini Wollenberg, Meryl Richards, 2016-08-23 This book provides standards and guidelines for quantifying greenhouse gas emissions and removals in smallholder agricultural systems and comparing options for climate change mitigation based on emission reductions and livelihood trade offs Globally agriculture is directly responsible for about 11% of annual greenhouse gas GHG emissions and induces an additional 17% through land use change mostly in developing countries Farms in the developing countries of sub-Saharan Africa and Asia are predominately managed by smallholders with 80% of land holdings smaller than ten hectares However little to no information exists on greenhouse gas emissions and mitigation potentials in smallholder agriculture Greenhouse gas measurements in agriculture are expensive time consuming and error prone challenges only exacerbated by the heterogeneity of smallholder systems and landscapes Concerns over methodological rigor measurement costs and the

diversity of approaches coupled with the demand for robust information suggest it is germane for the scientific community to establish standards of measurements for quantifying GHG emissions from smallholder agriculture Standard guidelines for use by scientists development organizations will help generate reliable data on emissions baselines and allow rigorous comparisons of mitigation options The guidelines described in this book developed by the CGIAR Research Program on Climate Change Agriculture and Food Security CCAFS and partners are intended to inform anyone conducting field measurements of agricultural greenhouse gas sources and sinks especially to develop IPCC Tier 2 emission factors or to compare mitigation options in smallholder systems

Agro-industrial Labour in Kenya Gerda Kuiper, 2019-05-21 This ethnography analyses labour relations within the export oriented cut flower industry at Lake Naivasha in Kenya Though this agro industry has attracted critical attention from journalists and non governmental organizations this book is the first comprehensive social scientific analysis of the industry s labour arrangements and production processes Gerda Kuiper here interprets the work on the farms as agro industrial labour a labour system characterized by high levels of discipline and a strict rhythm of work due to the demands posed by a highly perishable agricultural product This framework enables the author to draw on insights from a wide range of anthropological and sociological studies on agro industrial wage labour around the globe This mixed methods approach deployed alongside rich ethnographic detail allows the author to center the flower farm workers in her analysis
