One more pilot lamp at the dashboard has been added for head-lights in the cabin roof and it indicates if the roof head-lights are switched on at tractors with a cabin.

If the tractor has been equipped with the steering locking device with an electromagnetic interlocking, then a switch for the tractor head-lights is attached. Dimmed lights in the radiator cover or in the cabin roof can be switched on and off with this switch.

A switch box with steering locking device with electromagnetic interlocking can be attached on a special wish of the customer. When the ignition key is not inserted in the steering lock, the steering wheel is locked up (respectively the ignition key is inserted and turned into the position "STOP"). The steering wheel is unlocked in the position "0".

In the position "1" are all electrical devices of the tractor switched on.

In the position "2" is also the starting circuit switched on.
