

NGP-1100-U Universal Series IO

Overview

The Lenel NGP Input Control Module (ICM) provides the access control system with high-speed acknowledgment of critical alarm points in monitored areas. The ICM communicates directly with the NGP Controller by 2-wire RS-485 communication. The ICM has 16 configurable input control points and 2 output control relays. It supports normally open, normally closed, supervised and non-supervised circuits.

The input circuits are scanned using an analog-to-digital converter. The digitized input status signal is software-monitored and controlled, so that each input point can be programmed as a supervised or non-supervised alarm point.

The output relays can also be configured for fail-safe or fail-secure operation. Each relay supports the "On," "Off," and "Pulse" Lenel OnGuard software commands.
