Women v. Religion Karen L. Garst, 2018-06-01 Throughout history, religion has been used as a tool of female subjugation. Women have been deemed less worthy than men, have been prevented from owning property, and worse, all in the name of a higher power. In recent decades, women have made progress in terms of equal rights with men at least in Western democracies, but still, why has the United States never had a female president? Why aren't more women heads of Fortune 500 companies? Why do politicians in the West continue to attack women's reproductive rights? As this volume explores, it would be hard to find a bigger culprit than religion when identifying the last cultural barriers to full gender equality. With topics ranging from the subjugation of women in the Bible to the shame and guilt felt by women due to religious teaching, this volume makes clear that only by rejecting the very system that limits their autonomy will women be fully liberated from its malignant influences, not just in codified law but also in cultural practice.

Humanism and Technology Anthony B. Pinn, 2016-11-23 This book interrogates the ways in which new technological advances impact the thought and practices of humanism. Chapters investigate the social, political, and cultural implications of the creation and use of advanced forms of technology, examining both defining benefits and potential dangers. Contributors also discuss technology's relationship to and impact on the shifting definitions we hold for humankind. International and multi-disciplinary in nature and scope, the volume presents an exploration of humanism and technology that is both racially diverse and gender sensitive. With great depth and self-awareness, contributors offer suggestions for how humanists and humanist organizations might think about and relate to technology in a rapidly changing world. More broadly, the book offers a critical humanistic interrogation of the concept of progress, especially as it relates to technological advancement.
