Los grandes problemas de México. Tomo 12. Relaciones internacionales Blanca Torres y Gustavo Vega, coordinadores, Fundamentos de filosofía del derecho Helmut Coing, 2023-12-01 Las investigaciones siguientes se basan en la experiencia de que la formación del derecho aunque sin duda objeto de la libertad humana no lo es de un arbitrio sin vnculos Frente al juez igual que frente al legislador se yerguen conexiones esenciales morales y objetivas en cuyos límites solo es posible una formación jurídica según la naturaleza de la cosa Este estudio intenta aclarar sobre esa base la esencia del derecho y las condiciones en que este se origina Una filosofía del derecho no puede ni debe evitar las cuestiones políticas En este punto he creído que mi tarea consista en precisar con claridad hasta qué punto nos llevan determinadas concepciones típicas y en qué lugar surgen en cambio problemas que solo pueden aclararse empíricamente mediante el estudio y la valoración de material sociológico fáctico Solo de este modo es en mi opinión posible mantenerse dentro de los límites señalados a la filosofía del derecho en este terreno Estaba fuera de mis intenciones el ofrecer una exposición histórica de la filosofía del derecho o del naturalismo Lo único que me he propuesto es llevar al lector hasta los problemas fundados en el derecho y en su posición en la vida social Helmut Coing *Métodos cuantitativos de organización industrial II* José María Sallán Leyes, Joan Baptista Fonollosa Guardiet, 2009-11 Esta obra constituye el material básico de estudio de la asignatura Métodos Cuantitativos en Organización Industrial II de la carrera de segundo ciclo de Ingeniería en Organización Industrial de Terrassa ETSEIT En particular pretende ser la obra de referencia para cursar dicha asignatura de modo semipresencial En la línea de la obra anterior se introducen técnicas de métodos cuantitativos para su aplicación en las organizaciones muy especialmente en las actividades de planificación y diseño del sistema productivo El primer módulo es de tipo introductorio y muestra el hilo conductor entre las técnicas expuestas en el libro se trata de

obtener modelos del comportamiento de sistemas dinamicos deterministas o estocasticos en los que cabe la posibilidad de introducir elementos de decision El segundo modulo muestra tecnicas de teoria de colas y contiene una introduccion a los modelos de colas exponenciales con servidores en paralelo El tercer modulo desarrolla la teoria de las cadenas de Markov y aborda el analisis topologico y espectral y los procesos markovianos de decision Finalmente se introducen elementos de programacion dinamica y sus aplicaciones al entorno de la organizacion industrial Al estar destinada a estudiantes universitarios de segundo ciclo la obra se centra basicamente en la obtencion y explotacion de modelos cuantitativos mas que en los fundamentos matematicos de las tecnicas

Changes, Conflicts and Ideologies in Contemporary Hispanic Culture Teresa Fernandez Ulloa, 2014-06-02 This book is formed by various chapters studying the manner in which conflicts changes and ideologies appear in contemporary Hispanic discourses The contributions analyze a wide variety of topics related to the manner in which ideological and epistemological changes of the 19th 20th and 21st centuries are reflected in and shape Spanish language literature and other cultural expressions in both Spain and Latin America The 19th century was conducive to various movements of independence while in Europe radical changes of different types and in all contexts of life and knowledge occurred Language was certainly affected by these changes resulting in new terminology and discourse strategies Likewise new schools of thought such as idealism dialectic materialism nihilism and nationalism among others were established in addition to new literary movements such as romanticism evocative of r evolution individualism and realism inspired by the social effects of capitalism Scientific and technological advances continued throughout the 20th century when the women s liberation movement consolidated The notion of globalization also appears simultaneously to various crises despotism wars genocide social exclusion and unemployment Together these trends give rise to a vindicating discourse that reaches large audiences via television The classic rhetoric undergoes some changes given the explicit suasion and the absence of delusion provided by other means of communication The 21st century is defined by the flood of information and the overpowering presence of mass communication so much so that the technological impact is clear in all realms of life From the linguistic viewpoint the appearance of anglicisms and technicalities mirrors the impact of post modernity There is now a need to give coherence to a national discourse that both grasps the past and adapts itself to the new available resources with the purpose of conveying an effective and attractive message to a very large audience Discourse is swift since society does not seem to have time to think but instead seeks to maintain interest in a world filled with stimuli that in turn change constantly Emphasis has been switched to a search for historical images and moments that presumably explain present and future events It is also significant that all this restlessness is discussed and explained via new means such as the world wide web The change in communication habits e mail chats forums SMS and tools computers mobile phones that was initiated in the 20th century has had a net effect on the directness and swiftness of language
