*Iberian Empires and the Roots of Globalization* Ivonne del Valle, Anna More, Rachel Sarah O'Toole, 2020-01-15 Through interdisciplinary essays covering the wide geography of the Spanish and Portuguese empires *Iberian Empires and the Roots of Globalization* investigates the diverse networks and multiple centers of early modern globalization that emerged in conjunction with Iberian imperialism *Iberian Empires and the Roots of Globalization* argues that Iberian empires cannot be viewed apart from early modern globalization From research sites throughout the early modern Spanish and Portuguese territories and from distinct disciplinary approaches the essays collected in this volume investigate the economic mechanisms administrative hierarchies and art forms that linked the early modern Americas Africa Asia and Europe *Iberian Empires and the Roots of Globalization* demonstrates that early globalization was structured through diverse networks and their mutual and conflictive interactions within overarching imperial projects To this end the essays explore how specific products texts and people bridged ideas and institutions to produce multiple centers within Iberian imperial geographies Taken as a whole the authors also argue that despite attempts to reproduce European models early Iberian globalization depended on indigenous agency and the agency of people of African descent which often undermined or changed these models The volume thus relays a nuanced theory of early modern globalization the essays outline the Iberian imperial models that provided templates for future global designs and simultaneously detail the negotiated and conflictive forms of local interactions that characterized that early globalization The essays here offer essential insights into historical continuities in regions colonized

by Spanish and Portuguese monarchies

The Body of the Conquistador Rebecca Earle, 2012-04-23

This fascinating history explores the dynamic relationship between overseas colonisation and the bodily experience of eating It reveals the importance of food to the colonial project in Spanish America and reconceptualises the role of European colonial expansion in shaping the emergence of ideas of race during the Age of Discovery Rebecca Earle shows that anxieties about food were fundamental to Spanish understandings of the new environment they inhabited and their interactions with the native populations of the New World Settlers wondered whether Europeans could eat New World food whether Indians could eat European food and what would happen to each if they did By taking seriously their ideas about food we gain a richer understanding of how settlers understood the physical experience of colonialism and of how they thought about one of the central features of the colonial project The result is simultaneously a history of food colonialism and race
